### To Ease Nixon's Relations With Congress

## *Greece Said to Plan to End U.S. Arms Aid*

ATHENS, Jan. 12 (NYT).—Greece has decided to give up U.S. military aid, a qualified source disclosed here tonight. The U.S. government is aware of the intention, he said, and an official announcement is due soon.

The source was confirming a report that appeared in the Athens newspaper Vradyni today. It said the leaders of the military-backed government plan to renounce American grant aid to ease the Nixon administration's position in Congress, which is critical of aid to the Greek dictatorship.

The United States has poured a billion dollars worth of military hardware into Greece since 1947, first to help defeat a Communist armed revolt, then to bolster Greece's defenses as a North Atlantic Treaty Organization ally. Resumption of U.S. military aid, after an army officers' coup in 1967 that suppressed democracy in Greece, has come under heavy congressional fire.

Details of the American Military Assistance Program to Greece are secret. But officials said total U.S. aid to Greece for 1972 was about $72 million, including roughly $15 million in grant aid and $58 million in credits under the Foreign Military Sales Act.

There was no indication Athens would also give up the sales credits, nor alter plans for cash purchases of U.S. arms, including Phantom jets, at a cost of $80 million this year.

Total U.S. grant aid to Greece in the three years from 1968 to 1970 was said by American officials here to have amounted to $164 million.

Reports of the Greek regime's renunciation of grant aid came barely five days after a navy-to-navy agreement granting the American fleet gratis home-port facilities in the Athens area.

**Mainly Symbolic**

Vradyni said the eventual relinquishment of grant aid, which is more symbolic than substantial, will "limit the possibilities of Congress to criticize Washington's policy toward Athens."

Greek officials refused to confirm or deny the report. A spokesman for the U.S. Embassy in Athens, after making inquiries, returned with a "no comment" reply to reporters' questions.

Diplomatic sources said they did not rule out an Athens-Washington deal on this issue in a bid to eliminate a sore point in relations between Congress and the administration.

In fact, Greece would be the first country to renounce grant aid voluntarily. These sources said the gesture, while boosting Greek national pride, also underlines the boom in the Greek economy, which has permitted Greece to buy arms commercially —Phantoms from the United States, missile gunboats and tanks from France and submarines from West Germany.

## New Earthquakes Shake Nicaragua

MANAGUA, Nicaragua, Jan. 12 (Reuters).—Fresh earthquakes today shook this Central American republic, whose capital, Managua, was devastated on Dec. 23.

The new quakes at midday brought people rushing in panic from buildings in the towns of Masaya and Jinotepe. The towns are crammed with refugees from the Managua quake last month.

Masaya is 20 miles southeast of Managua and Jinotepe is 28 miles to the south.

The tremors were felt lightly in Managua. There was also a noticeable increase in the activity of nearby volcanoes.

## Russians, GE Sign An Accord

### On Technology of Power Turbines

By Theodore Shabad

MOSCOW, Jan. 12 (NYT).—The Soviet Union and the General Electric Co., one of America's industrial giants, signed a wide-ranging agreement here today for joint development of electric-power generating technology.

The accord, which was concluded by Thomas A. Paine, a General Electric vice-president, also provides for exchanges of specialists and production samples of turbines and other power equipment, as well as for joint research and development programs.

On the Soviet side, the new agreement was negotiated by the government's State Committee for Science and Technology, which is responsible for all applied research and development activities in the Soviet Union.

Although no specific price tag was set on the accord, Mr. Paine described it as a "broad foundation that may ultimately lead to hundreds of millions of dollars worth of business" between the Schenectady, N.Y., concern and the Soviet government.

**Long-Term Accords**

The broad policy agreement appeared to follow a pattern favored by the Soviet authorities in an effort to set their newly developing relations with American companies on a formal, long-term basis. A similar accord of intent in several areas of cooperation was signed last year by Occidental Petroleum Corp., a conglomerate based in Los Angeles.

For General Electric, the agreement, coming after five years of preliminary contacts, represented a return to the Soviet scene. The company was among American business concerns that were active in the Soviet Union in the early 1920s, when Lenin granted business concessions to foreign concerns in an effort to build up the Soviet economy.

In the 1930s, General Electric manufactured hydraulic turbines for the Dnieper Dam, the Soviet Union's first major producer of hydroelectric power. During World War II, the company supplied the Red Army with an entire generating plant built on railroad cars that could move with military operations.

However, with the onset of the cold war, business relations between General Electric and the Soviet government ceased in 1948, and there was a 20-year hiatus before contacts were renewed in 1968.

**Mutual Benefit**

At a news conference at the American Embassy, Mr. Paine, who is a former administrator of the National Aeronautics and Space Administration, said each side was ahead of the other in some phases of electric power technology. He said that he saw mutual benefit in the pooling of efforts to meet the vastly increased needs of generating capacity in the years ahead.

As a starter, Mr. Paine said, priority is to be given to mutual exchange and development of steam and gas turbines and of nuclear power reactors.

The GE executive dwelt in particular on the need for joint development of gas turbines, for which the company signed a separate agreement in April with the Soviet Union's Ministry of Heavy and Power Equipment.

### Reacting to Senate Testimony

## *U.S. Insists It Won't A-Bomb N. Vietnam*

WASHINGTON, Jan. 12 (AP).—The White House, the State Department and the Defense Department today ruled out the use of nuclear weapons by the United States in the Vietnam war.

The subject came up as the result of testimony yesterday by William P. Clements, designated to become the deputy secretary of defense.

In responding to a question on the possible use of nuclear weapons in Vietnam if the Paris peace talks broke down, Mr. Clements told the Senate Armed Services Committee:

"I wouldn't eliminate it, but that is not to say I'd be in favor of it either."

At the White House, Presidential Press Secretary Ron Ziegler said that President Nixon repeatedly has made it clear that nuclear weapons are "not one of the contingent elements he will use in relation to Vietnam."

UPI.

**William P. Clements.**

**'That Remains Our Policy'**

At the State Department, press officer Charles W. Bray 3d recalled that Secretary of State William P. Rogers has declared twice that the United States will not use nuclear weapons in Indochina.

"That remains our policy," said Mr. Bray.

At the Pentagon, spokesman Jerry W. Friedheim first was reluctant to discuss American policy regarding nuclear weapons in Southeast Asia or to even state what that policy is. But later, during a lengthy session with reporters, he acknowledged that there had been no change in policy "as previously stated" by administration officials.

However, he refused to restate the policy until a messenger brought in a note from Secretary of Defense Melvin R. Laird in which, Mr. Friedheim said, the secretary said he would not recommend the use of nuclear weapons in Southeast Asia.

Less than an hour after Mr. Friedheim's briefing, the Pentagon circulated a memorandum to newsmen quoting Mr. Clements as saying "I am in complete agreement with the policy" against use of nuclear weapons in Vietnam, as previously expressed by Secretary of State Rogers.

"I would like to clear up promptly any confusion that may

(Continued on Page 2, Col. 1)

## Kissinger, Tho Talk Six Hours

### Total for Week Is 27½ Hours

By Jonathan C. Randal

PARIS, Jan. 12 (WP).—Presidential adviser Henry A. Kissinger and North Vietnamese Politburo member Le Duc Tho conferred secretly for just over six hours again today in the fifth day of their renewed quest for a Vietnam cease-fire.

With 27 1/2 hours of discussions to their credit since Monday, a sixth session was scheduled for tomorrow morning.

Neither side departed from the rigidly enforced news blackout shrouding both the Kissinger-Tho meetings and the parallel technical discussions, which have been averaging eight hours a day since Jan. 2.

The very length of the discussions was beginning to prime hopes that both sides were making progress on details of an agreement.

But even if the discussions were able to settle still outstanding major obstacles, initialing—much less signature—of a cease-fire lay beyond President Nixon's Jan. 20 inauguration, observers suggested.

With the now-suspended bombing north of the 20th parallel still rankling the North Vietnamese, observers doubted that Hanoi could afford to announce any final agreement without facing charges they had buckled under American pressure.

Moreover, the United States also is believed resigned to an additional delay in order to inform the South Vietnamese government and Canada, which has refused to send troops for the international cease-fire supervisory commission before studying the agreement.

**Another Round Possible**

Another round of Kissinger-Tho talks could well be required to nail down final details before initialing and signature.

Despite the length of the major and technical secret discussions, there was no indication of what, if any, compromises either side had made on the outstanding substantive issues.

They are believed to center on the future of the Demilitarized Zone, which Hanoi wants as "porous" as possible. The United States, in Saigon's behalf, would like it to be an effective anti-infiltration barrier. A related issue is the Saigon regime's future legality as a separate entity.

The day's meeting at the Communist villa in suburban Gif-sur-Yvette got under way 15 minutes late because of snow and fog in and around the French capital. Mr. Kissinger and his team were greeted by a North Vietnamese protocol officer at the door of the villa which the late Cubist painter Fernand Léger bequeathed to the French Communist party.

**Technical Meeting**

The technical experts met for more than eight hours at the American villa a St.-Nom-la-Bretèche, west of Paris, where Mr. Kissinger and Mr. Tho will confer tomorrow morning in keeping with their rotation of the meeting site.

Both Mr. Kissinger and Mr. Tho smiled for photographers and newsmen but were careful to do so separately. This has become the unwritten rule in the current round of talks—presumably because of Hanoi's touchiness over the December bombing north of the 20th parallel.

**Clerics Fail to See Pope**

ROME, Jan. 12 (NYT).—Six Protestant, Catholic and Jewish religious returned to the United States today after being told here that Pope Paul VI could not see them personally to discuss American military activities in Indochina.

The group, headed by Dr. Harvey Cox, a Harvard University theologian, conferred yesterday with the secretary of the Vatican's peace and civil-rights agency, the Very Rev. Joseph Gremillion, an American.

Msgr. Gremillion said today he had explained to the visitors that Pope Paul is unable to see each of the hundreds of groups and individuals who request audiences every day and that he was deputizing for the Pontiff.

The group had said before leaving for Europe that it would seek the Pope's aid in mobilizing world opinion against the American role in the Vietnam war.

Msgr. Gremillion, secretary of the pontifical Commission for Justice and Peace, said today that the American group expressed deep concern over the recent escalation of the war in Indochina. "We were pleased to receive their message and welcomed their initiative," he said.

### *Differ on Force Cut Talks*

## Pompidou, Brezhnev Finish Summit in Broad Agreement

By Hedrick Smith

MOSCOW, Jan. 12 (NYT).—France joined the Soviet Union today in opposing the American view that convocation of a European security conference should depend at least partly on progress in forthcoming East-West talks on force reductions in Central Europe.

But at the conclusion of two days of talks with Soviet party leader Leonid I. Brezhnev, French President Georges Pompidou told newsmen that he had resisted Soviet urging that the French take part in the force reduction talks scheduled to start in Geneva late this month.

Before returning home to Paris tonight from Minsk, Mr. Pompidou also reported that he had outlined the French view of the need for a greater exchange of people and ideas in the Europe of the future and found Mr. Brezhnev receptive to the notion that there must be "an end to the permanent war of propaganda."

The two leaders concluded their talks at a country estate near Minsk in a warm show of cordiality and public concord that is expected to be helpful to Mr. Pompidou's Gaullists against the Communist-Socialist coalition in the forthcoming French elections, though Mr. Pompidou insisted that the two men had not touched on internal politics of either country, "even for a second."

But the clear public demonstration of Soviet enthusiasm for Mr. Pompidou and the constant

(Continued on Page 2, Col. 5)

## *Soviet Truck Puts Dent in Paris Relations*

MINSK, U.S.S.R., Jan. 12 (UPI).—A Soviet truck ran into and damaged the parked Air France jetliner that brought about 50 foreign newsmen and photographers from Paris for the French-Soviet summit talks, Air France officials said today.

The truck was part of a fleet of equipment de-icing the runway at Matchoulichi military airfield. Officials said the Caravelle's right wing was badly damaged and will require extensive repairs before the aircraft can fly again.

Soviet officials brought in an Ilyushin turboprop airliner to return the press corps to Paris tonight.

# Fuel Shortage in U.S. Worsens, Spreads to East Coast

### *Cuts by Suppliers Hit Trains, Barges, Trucks*

By Thomas O'Toole

WASHINGTON, Jan. 12 (WP).—The U.S. fuel shortage worsened yesterday in the Midwest, where major oil companies cut back shipments of diesel fuel to railroads, trucking companies, barges and bus lines serving at least seven major cities.

There were also signs that the fuel crisis had begun to spread East, with at least two oil companies telling diesel oil customers in the Eastern United States that their supplies for January would have to be reduced as much as 25 percent. One big trucking company outside of Philadelphia had its diesel oil shipments cut by 30 percent.

Meanwhile, the bitter cold that had lingered over the nation's interior for the last 10 days moderated under sunny skies—but not enough to end the fuel shortage.

Homes in Colorado and Nebraska were kept warm by 50-to-100 gallon "dumps" of heating oil, enough for three days to a week. Thirty schools were forced to close in Wichita because of the fuel shortage and in Rockford, Ill., the city's biggest fuel distributor said he had no oil left to supply between 6,000 and 7,000 customers.

The heating oil shortage sent Minnesota's Civil Defense director north to Canada, where he attempted to wring fuel out of Canada's Emergency Measures Office. Honeywell, Inc., and the University of Minnesota began lowering temperatures and steam pressures inside their buildings, although they insisted they had enough fuel to continue operations for several weeks to come.

"We've taken a 25 percent cut in heating oil shipments for January and February," a Honeywell spokesman said, "but that doesn't mean we're at the mittens and overshoes stage yet."

The most critical new shortage was in diesel fuel, which affected transport service on rivers, railroads and highways.

Barge traffic slowed up on the Mississippi and Ohio Rivers, delaying shipments of wheat for the Soviet Union and soybeans for Japan. Minnesota's Burlington-Northern Railroad reduced freight train speeds from 60 to 50 miles an hour and cut the number of locomotives hauling long freights from two to one.

Truckers throughout the Midwest reported their diesel shipments were either being limited or reduced, and at least one St. Paul trucking concern said that diesel fuel was being bootlegged out of Chicago at nine cents a gallon above the market price.

Bus companies in Minneapolis, St. Paul, Omaha, Denver, Kansas City, Mo., St. Louis and Milwaukee were all told that their diesel fuel supplies would be curtailed. Buses in Omaha and Minneapolis were running on a blend of diesel fuels, which the bus companies claimed produced more fumes and greater engine wear.

The Minneapolis-St. Paul Metropolitan Transit Co. was drawing up emergency plans to reduce Sunday and night service, a move that could mean a layoff of 200 employees.

There were conflicting reports about scarcities of jet fuel. The Air Transport Association claimed that companies supplying jet fuel to airliners at New York's Kennedy Airport were "scraping the bottom of the barrel," while the White House Office of Emergency Preparedness called the aviation fuel situation "generally good."

**Air Force Order**

The OEP said that the jet fuel shortage was limited to Texaco, Inc., which it said was attempting to bolster its stocks by borrowing jet fuel from the Air Force on a reimbursable basis. Sen. Hubert H. Humphrey, D., Minn., claimed that the Air Force had put out an emergency call for 113 million gallons of jet fuel to tide it over the next three months.

"It may well be that the Defense Department needs additional JP-4 [jet fuel]," Sen. Humphrey wrote Defense Secretary Melvin R. Laird, "but surely any additional supply order should be tempered or moderated by the urgent requirements of our domestic economy."

**Dependence on Mideast**

ROME, Jan. 12 (UPI).—A new report on world energy needs warns that within 10 years the industrial nations of the West could find themselves at the mercy of Middle East oil producers.

"The one-time Western notion that the consumer is safe because the Arabs must sell their oil is now a myth," the report said. It was prepared by Rome's Center for Mediterranean Studies. "The West's insatiable appetite has turned the oil market of the 1970s into a seller's market of unusual security and size."

The report said that Persian Gulf states will have ever-greater currency reserves at their disposal, a factor that could cause havoc in world financial markets. It said that the states, not including Iran, may easily be earning $30 billion a year by 1980.

The report predicted that the United States alone would have to meet a bill of about $70 billion annually for foreign oil by 1980.

*'Traditional' Enemy Area*

# Suspected Red Sites Bombed 40 Miles Northwest of Saigon

SAIGON, Jan. 12 (AP).—B-52 bombers today rained tons of bombs on suspected Communist troop locations between the old Michelin and Lai Khe rubber plantations, 40 miles northwest of Saigon.

A spokesman for the U.S. command said 42 B-52 strikes were flown against this "traditional enemy staging area." Several secondary explosions were reported, he said.

It was the second time in two months that B-52s have raided the area, which largely has been controlled by the North Vietnamese since spring.

It recently had been reported that the North Vietnamese were attempting to move heavy artillery and possibly tanks across the Cambodian border into South Vietnam, just north of the raided area.

B-52s and fighter-bombers continued to hammer targets in the southern panhandle of North Vietnam.

**114 Missions in North**

The big bombers made 36 strikes above the Demilitarized Zone while the fighter-bombers flew 115 in the North, the U.S. command said.

The targets, mainly supply centers, ranged from two miles south of the port city of Vinh to the DMZ itself.

U.S. spokesmen confirmed that an Air Force A-7 attack bomber crashed in northeastern Thailand last night while returning from a combat mission. The pilot bailed out safely.

It was the 36th American warplane acknowledged lost in Indochina since Dec. 18, when the United States began to hit North Vietnam with major raids, since restricted to the area south of the 20th parallel.

Military sources reported that strict security measures were in effect at the U.S. command's "Pentagon East" headquarters at Tan Son Nhut Air Base after intelligence reports indicated that Communist terrorists planned a raid there.

Hanoi's official press agency said today that four North Vietnamese Air Force lieutenants have been decorated for downing a total of 21 U.S. planes and for helping their units knock 13 others out of the skies.

**24 Unit Decorations**

The agency said that on the orders of North Vietnam's President Ton Duc Thang, 24 regular and irregular military units have been designated "heroic" for their efforts in the war.

Enemy ground forces in South Vietnam were reported by the Saigon command to have initiated 62 incidents in the 24 hours ending at dawn today. Most were rocket and mortar attacks, the command said.

In Cambodia, a force of Vietnamese and Cambodian Communists seized seven government outposts on the Mekong River about 30 miles east of Phnom Penh, halting vital cargo shipments to the capital.

Two other government positions, on Highway 1 at Kompong Soeung and Rumchek, fell yesterday under heavy Communist pressure.

The blockade of Mekong River traffic to Phnom Penh deprived the capital of a major route for supplies of fuel, food and other necessities sent from Saigon. The seven outposts were taken by the Communists in the first major fighting on the river's east bank in three months.

# Meningitis Death No. 2 in French Units in Germany

MUELHEIM, West Germany, Jan. 12 (AP).—A second meningitis death among French troops stationed in this country was reported today by the French Army, which said that its posts here and at Breisach have been put under indefinite quarantine. A spokesman said six meningitis victims remain in French Army hospitals, but none is in critical condition.

The spokesman said that at the two posts 10 French soldiers had been identified as having meningitis.

The first death occurred Dec. 23 and the second on Sunday.

Of those stricken by the disease, most are from the south of France and "apparently have never come into contact with this type BE meningitis," the spokesman said. "They also are not accustomed to this climate."

German sources suggested that the soldiers' resistance had been lowered by strenuous recruit training.

# *Mrs. Boggs Seeks Husband's Seat*

WASHINGTON, Jan. 12 (AP).—Mrs. Lindy Boggs announced today she will be a candidate for the Louisiana congressional seat of her husband, House Majority Leader Hale Boggs, who was lost on an airplane flight in Alaska Oct. 16.

A special election has been called for March 20, with a primary Feb. 3.

Rep. Boggs was re-elected after his disappearance. The House, by resolution, declared the seat vacant when it convened Jan. 3.

# *U.S. Reaffirms It Won't Use A-Arms in N. Vietnam*

(Continued from Page 1)

have unintentionally resulted from my remarks yesterday before the Senate Armed Services Committee," the Clements statement said.

"I believe the Department of State has said again today that the comments of Secretary Rogers of April 17, 1972, on the subject of nuclear weapons' use in South Vietnam or North Vietnam remain the firm United States policy, and I wish to reiterate, myself, Secretary Rogers's words: "We are not going to use nuclear weapons in South Vietnam or North Vietnam'."

In Saigon, the U.S. military command refused to say whether any nuclear weapons are stockpiled at U.S. bases in Southeast Asia or aboard U.S. Navy ships operating in the area. But one Saigon newspaper said Mr. Clements "clearly told the committee the inevitable: The U.S. may use the atomic bomb if the negotiations break up."

The paper, Tin Song, has been considered a mouthpiece for President Nguyen Van Thieu. But political sources in the Vietnamese capital indicated this week that this relationship may have changed.

Mr. Clements's comments yesterday were made in response to what he called "philosophical questions" by Sen. Harold E. Hughes, D., Iowa.

Mr. Clements said he would support the military decisions of President Nixon.

Would that include the use of nuclear weapons in Vietnam if peace negotiations fail? Sen. Hughes wanted to know.

"I would have to study that," Mr. Clements responded. "I am not prepared to make that choice today."

Would he eliminate the thought of using nuclear weapons?

"I wouldn't eliminate it, but that is not to say I'd be in favor of it either," Mr. Clements replied.

He said he recognized the difference between conventional warfare and the use of tactical nuclear weapons.

Sen. Hughes asked if Mr. Clements was not prepared to say whether "the line should be crossed."

**'Where, When, Who'**

"That would depend entirely on what the circumstances are, where, when, who," Mr. Clements said.

Sen. Hughes then described a set of circumstances: "Paris, 1973. Jan. 11, no agreement in sight. Would you be willing to cross the line?"

"As I understand the situation, with my limited knowledge—I want to emphasize that—the answer would be no," Mr. Clements said.

Would he rule it out under any circumstances?

"I beg out on this one," Mr. Clements said, adding it is a "very complicated issue. I am not prepared to give you a philosophical view."

Mr. Clements said also he still held to his view in a September, 1970, minority report of a blue-ribbon panel studying the Defense Department that the trend in Russian military development was making the United States a second-rate power.

He added that his No. 1 objective in accepting appointment to the Defense Department is to "reverse the curve."

Mr. Clements, founder and board chairman of Sedco, Inc., an oil-drilling firm, was not questioned about a suit pending in Dallas accusing him and three associates of failure to pay commissions to an Argentine businessman for help in obtaining an oil-drilling contract in Argentina.

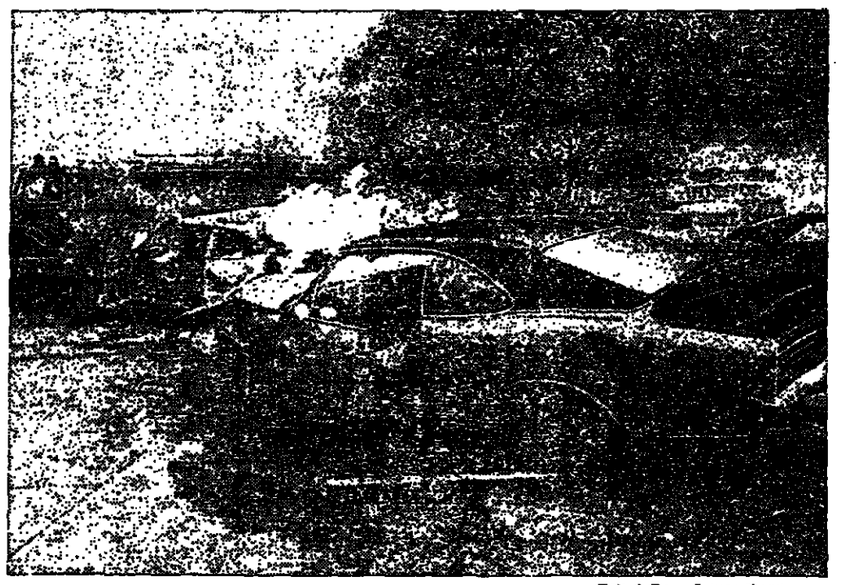

Armed Forces Committee chairman John C. Stennis, D., Miss., called a closed meeting to inquire about Mr. Clements's financial holdings. He said Mr. Clements had submitted a list of holdings and a "plan which I think will be satisfactory to the committee."

Sen. Stennis said the committee would seek a vote today on the nominations of Mr. Clements and Elliot L. Richardson, designated to become secretary of defense, after a hearing on the nomination of James R. Schlesinger to be director of the Central Intelligence Agency.

**Hanoi Is Critical**

PARIS, Jan. 12 (UPI).—A North Vietnamese spokesman today criticized the comments of Mr. Clements.

"This threat throws a full light on the war hysteria of the war-mongering American governmental circles toward the Vietnamese people," the spokesman said.

United Press International.

Scene of giant road crash Friday morning on new turnpike west of Copenhagen.

## *100-Car Chain Collision in Denmark Claims 2 Lives*

COPENHAGEN, Jan. 13 (AP).—Two persons were killed and eight others hospitalized today when more than 100 cars piled up in a series of collisions in heavy fog on an icy highway west of here.

Police said more than 30 cars were wrecked and three caught fire. There was no count of vehicles with light damages, but the estimate was 70 to 80.

A tank truck skidded, overturned and blocked one lane of the highway. Within minutes, police said, more than 20 cars piled into it or into each other.

In the opposite lane, two motorists—apparently distracted by watching the first crash—ran into each other and started a new pile-up of a dozen cars, police said.

Fifteen ambulances, two fire engines, 10 salvage trucks and three doctor-nurse disaster team, sped to the scene. Two ambulances collided and police patrol cars were used to take injured to the hospital.

# *Major Strike In Italy Aims At Reforms*

ROME, Jan. 12 (AP).—Millions of Italian workers struck for half a day today in an anti-government protest. But in Rome, where the strike was supposed to hurt most, thousands spent hours getting to work in their cars in chaotic traffic despite a union call to stay home for the whole day. The call was reinforced by a daylong bus stoppage.

The strike shut most of the big industrial plants in the north and stopped all activities in the main ports.

Ground personnel and stewards walked out for two hours at the airports, but pilots reported to work. Passengers had to carry their luggage at midmorning, but planes suffered only minor delays.

Trains stopped for only half an hour at midmorning in token participation.

**Three Federations**

Both Communist and non-Communist trade unions joined in the political strike. But many in the Socialist-controlled federation, UIL, and moderates representing about 50 percent of the Catholic federation, CISL, made it known that they had agreed to the strike only for the sake of class unity.

The strike was meant to dramatize the unions' rejection of government plans for long-pending reforms in housing, schools, medical care and hopitals.

Communist and other leftist union leaders made it clear that they believed Premier Giulio Andreotti's government could never meet their demands, because it is based on a center-right alliance. Mr. Andreotti's seven-month-old government put and end to a decade of center-left alliances of the dominant Christian Democrats with the Marxist Socialists.

*Accuses Christian Democrats*

# Italian Anti-Mafia Official Quits Because Panel 'Sleeps'

ROME, Jan. 12 (Reuters).—The secretary of Italy's anti-Mafia commission, Sen. Vincenzo Gatto, said yesterday he had resigned his post because the commission was "asleep" while the Mafia was thriving.

The parliamentary commission originally was set up 10 years ago to seek out the root causes of the notorious criminal brotherhood and propose measures for stamping it out. The present third version of the commission has been beset by political squabbles ever since it took over from its predecessor in October, following general elections in May.

In a letter of resignation sent Wednesday to the commission's president, Sen. Luigi Carraro, Sen. Gatto said his main reason for quitting was that the commission's "presidential office"—consisting of its leading members—had never been convened.

But the Socialist senator also accused the dominant Christian Democratic party of trying "to hinder even that little which was done in the past legislature from taking concrete shape."

**'Killing Goes On'**

The letter quoted a headline which appeared Wednesday in the Milan newspaper Corriere Della Sera: "The Anti-Mafia Dozes While the Killing Goes On at Palermo."

The senator added: "The commission is, in fact, asleep and one does not even know if it exists any more. And this while the Mafia shows that it is finding again old places which had been shut off to it."

Sen. Gatto referred to a fellow commission member, Christian Democrat Giovanni Matta, deputy for Palermo, who once served on the Palermo City Council as a councilor for town planning.

Mr. Matta was heard as a witness by the previous version of the commission, which lasted from 1968 to 1972, in connection with Mafia activities in the field of speculative building in Palermo.

One commission member, left-wing Christian Democrat Carlo Torella, already has resigned over the inclusion of Mr. Matta on the commission. Sen. Gatto said yesterday he also would resign from the commission altogether if the "Matta affair" was not settled quickly.

The last commission produced a seven-volume report, concluding that the Mafia only survived because of complicity by political authorities.

Sen. Carraro has said in an interview that he believes the dynamism of the last commission went too far and that he proposed to put in order the accumulated material and wind up the commission's activities as quickly as possible.

**Mafia Figure Released**

PALERMO, Jan. 12 (UPI).—Frank (Three Fingers) Coppola, former reputed Mafia boss of Kansas City, Mo., was a free man again today—but under court orders to live in a remote village of northern Italy until he is brought to trial on charges of criminal conspiracy, drug trafficking and smuggling.

Judge Filippo Neri granted provisional freedom yesterday to Coppola and nine others. But he ruled that Coppola, 73, must await trial in enforced residence at Aiello del Friuli, a village of 2,334 inhabitants in a rural area near the Yugoslav border.

Coppola was deported from the United States in 1948 as an "undesirable." U.S. officials once described him as a close associate of such gangland figures as Santo Trafficante and Lucky Luciano.

**Crime Rate Rising**

ROME, Jan. 12 (UPI).—The crime rate in Italy is rising by more than 10 percent a year, the nation's chief prosecutor said today.

Ugo Guarnera said in a speech opening the judicial year that crimes reported between July 1, 1971, and June 30, 1972, totaled 1,198,177, amounting to a yearly increase of 11.5 percent, the same as the previous year.

Mr. Guarnera said thefts were up 25.1 percent to 626,345. There were 4,068 robberies, extortions and kidnappings, an increase of 16.8 percent. The number of murder and manslaughter charges also rose.

# *Bonn Spokesman Warns U.S. That War Perils Friendship*

BONN, Jan. 12 (AP).—Deeply disturbed by the Vietnam war, Chancellor Willy Brandt's government has broken a long and controversial silence to warn that the United States might lose its European friends if the war is not ended.

A spokesman for the Brandt regime, one of America's staunchest allies, elevated to official policy today a speech by Finance Minister Helmut Schmidt expressing this concern.

Mr. Schmidt said the war is "deeply disturbing" and, if it is not ended, "the danger of alienation might turn into reality and thereby deeply influence the development of European-American relations."

The spokesman said Mr. Schmidt's warning speech, made at Newberry, S.C., last night, will be published in the official Bonn government bulletin.

Until now, Mr. Brandt had kept silent on the U.S. role in Vietnam.

He had avoided comment despite growing leftist demands within his Social Democratic party that he condemn the recent heavy bombing of North Vietnam. Mr. Brandt had feared damaging U.S.-German relations.

With anti-war demonstrations continuing, the Nobel Peace Prize winner returned to Bonn from a vacation after a Red Cross demand that he help prevent "a regression into nuclear warfare" in Vietnam.

Meanwhile, Mr. Brandt faced another problem: whether to grant an entry visa for a Viet Cong representative invited to speak Monday at an anti-war rally organized by the big Frankfurt branch of Mr. Brandt's Socialist party.

A Foreign Ministry spokesman said it was weighing whether or not to grant the visa to Tran Van Du, a member of the Viet Cong mission in Paris. Bonn sources doubted that permission would be given.

Refusal to let Mr. Du speak could spark further tension between leftists and moderates within Mr. Brandt's ruling party.

Militant Young Socialists, claiming to speak for 250,000 party members, have labeled Mr. Brandt a "stooge of imperialist aggressors" for keeping silent about the U.S. bombing.

Helmut Schmidt

Pyramid Seekers Shrug Off Crises

# *Egypt Invaded—But by Tourists*

By William J. Coughlin

CAIRO, Jan. 12.—At the height of the student riots in Cairo last week, a stout American woman pushed her way determinedly through the mob.

"I came here to see the Pyramids and I am going to see them," she declared.

Middle East crisis or not, tourists are flocking to Egypt this winter season in the greatest numbers since the 1967 Arab-Israeli war.

So great is the tourist boom, with its attendant foreign-exchange earnings, that some observers here believe it is becoming a factor in President Anwar Sadat's reluctance to reopen hostilities with Israel.

"Fly-overs by Israeli Phantoms definitely are not a tourist attraction," one of them said.

Airline seats from Cairo to Luxor and Aswan now are booked up days in advance. Six Nile River steamers are sold out for the season and travelers holding confirmed reservations are sleeping on the floors of Luxor and Aswan hotels.

Latest figures show a 27 percent increase in tourism over last year for the first nine months of 1972, but that was before the winter rush began. Before the six-day war, Egypt drew about 580,000 visitors a year. That dropped off sharply after the war but climbed again to 360,000 in 1970 and 430,000 last year.

Officials believe the crowds this year may top even those of the early 1960s, reaching as high as 650,000. The jam at hotels in Cairo and elsewhere suggests their optimism may not be unfounded.

According to el-Sayed Mohammed el-Sakka, chairman of the board of Egypt Travel Co. and chairman of the Chambers of Tourism, lack of hotel space already is slowing the boom.

"We need a large number of first and second-class hotels . . . and a large number of first-class restaurants for tourists."

Despite the lack of diplomatic relations between Egypt and the United States, there is no absence of warmth in Egypt's interest in the American tourist.

Mr. el-Sakka said a recent trip to the United States to promote the Egyptian tourist trade was "very successful." He said agreements were reached with a number of American travel agencies to add Egypt to their itineraries despite the unsettled conditions in the Middle East.

The situation since the war has blocked plans to open resorts in such areas as the Red Sea. It also has discouraged investment of private capital in the tourist industry.

But as if to put a seal of approval on the boom, those world travelers, the Japanese, now have discovered Egypt and are arriving in increasing numbers. Egyptian tourist officials have visited Japan to encourage the trend.

But the greatest number of visitors to Egypt remains Europeans, with the French leading the list. The Russians held second place last year, ahead of the British and West Germans, but that is expected to change in the wake of Mr. Sadat's ouster of 20,000 Soviet military advisers in July.

Minister of Tourism Zaki Hashim expects about five million tourists to visit Egypt within the next 10 years. Unless the boom is interrupted by a renewal of hostilities, Mr. Hashim anticipates that the flow of American tourists to such Mediterranean countries as Spain, Greece and Italy will turn on again to Egypt.

It was no surprise last month then, to find many American cheering on the Yale and Harvard crews in two races on the Nile against British and Egyptain eights.

# Sadat and Tito End Meeting Without Hint of Peace Plan

By Dan Morgan

BELGRADE, Jan. 12 (WP).—Egyptian President Anwar Sadat finished a day of talks with President Tito and returned home today without indicating that any new plan for breaking the middle East deadlock had been worked out.

The two presidents issued a communiqué that condemned Israeli attacks against Palestinian units in Syria and Lebanon, denounced American bombing of North Vietnam and called for strengthening nonaligned nations.

Details of a three-hour meeting yesterday between Mr. Sadat and Marshal Tito were not disclosed.

Western diplomats here speculated that Mr. Sadat, who is under domestic pressure to break the Middle East stalemate, may have renewed the periodic Egyptian-Yugoslav consultations at this time to convey his own personal sense of urgency.

Rumors that circulated before the meeting suggested that Mr. Sadat might ask Marshal Tito to arrange a special meeting with one or more Western or Communist leaders, or to press Moscow for increased military aid to Egypt. These reports were not confirmed.

Both Egypt and Yugoslavia have some misgivings about the effects of American-Soviet détente on their interests. Yugoslav officials would like to use the nonaligned nation movement to offset some of the impact of big-power deals.

Hinting at this in an editorial this week, the Belgrade paper Borba said the international situation showed that "the activity of nonaligned countries is more necessary than ever."

In a toast to Mr. Sadat last night, Marshal Tito gave a gloomy assessment of world politics. He said that "things are not getting better and could be said to be worse than a year ago . . ."

He backed Egyptian proposals for peace and said that Egypt had a right also to use "other means at its disposal" to liberate occupied territories.

Yugoslavia broke diplomatic relations with Israel in 1967. Some Yugoslav officials say privately that this may have been a mistake because it eliminated Yugoslavia as a credible peace mediator.

# *Palestinians End Conference With Re-Election of Arafat*

By Henry Tanner

CAIRO, Jan. 12 (NYT).—The Palestine National Council today ended a six-day conference with the re-election of Yassir Arafat as chairman of its executive committee but with the dream of unified military and political action as remote as ever.

A communiqué issued by the council vowed unity for the future and pledged to continue the armed struggle until the liberation of Palestine has been achieved.

Informed sources, however, said that the council had not been able to overcome internal disagreements among its various groups.

The communiqué said nothing about two of the principal issues known to have been discussed by the delegates—the establishment of a unified military command, which would control the operations of all guerrilla groups, and the creation of a central treasury to collect and distribute increasingly scarce funds.

According to informed sources, the financial problem of the organization is partly due to the growing difficulty of collecting contributions from the inhabitants of the west bank of the Jordan, which is occupied by Israel. Several Arab governments, including Saudi Arabia and Kuwait, which had been generous in the past, are understood to have reduced their financial contributions.

Arab government leaders lately have been criticizing with increasing frequency the Palestinians' inability to achieve effective unity. Some of the conservative governments in the area are known to be concerned over what they believe is a growing leftist trend in the fedayeen organization.

Col. Moamer Qadhafi, President of Libya, recently announced that he had withdrawn Libyan volunteers serving with the guerrillas because they had not been used for military operations against Israel. Col. Qadhafi has been a generous supporter of the fedayeen.

Yassir Arafat

# UN Issues Report On Syrian Losses

UNITED NATIONS, N.Y., Jan. 12 (AP).—UN observers along the Israel-Syria cease-fire lines reported testimony today that more than 125 civilians had been killed in Israeli air raids on four Syrian villages Monday.

They said "witnesses" in the villages told them that well over 80 civilians died in Daal, 30 in Tafass, six in Mzairib and nine or more in Naous.

The observers visited the places Wednesday to investigate a complaint of the attacks filed by Syria. Their report, issued as a Security Council document, said they had confirmed the complaint.

Israel Monday said its planes had attacked five guerrilla and army positions in Syria.

## Pakistan POWs Killed

NEW DELHI, Jan. 12 (AP).—Four Pakistani prisoners of war were killed and 10 others injured yesterday as they were trying to escape from a camp in Uttar Pradesh state.

# Mrs. Meir Greeted in Paris By Horde of Security Guards

(Continued from Page 1)

Wilson also is expected to participate.

The last formal meeting of what is known as the Socialist International, the common organization of the various national parties, occurred last year in Vienna.

**Airport Police Guard**

PARIS, Jan. 12 (UPI).—Mrs. Meir arrived amid some of the tightest security measures provided by French police for a visiting foreign leader.

More than 150 riot policemen, gendarmes and carloads of detectives swarmed throughout Orly Airport to protect her.

Police with walkie-talkies scrutinized arriving passengers, many of them Algerians going home for holidays.

At the embassy, she received a steady stream of French politicians and others prominent in the days when France was Israel's closest ally in the West.

By early evening, she had received about 30 persons representing the Zionist congress, the French-Israeli Friendship Association and the Israeli Labor party.

# *Pompidou, Brezhnev Conclude Summit Talks*

(Continued from Page 1)

echoes of Soviet-French cooperation and agreement was interpreted by other diplomats as a form of Soviet endorsement for the Gaullist leader over the French Communists and their allies.

In their joint communiqué, which emphasized their agreements, the two leaders made these main points:

● They felt "profound concern" over delays in the settlement of the Vietnam war, hoped the current Paris talks would produce "an early settlement" and pledged to continue their own unspecified behind-the-scenes efforts to "facilitate" agreement.

● They advocated the reactivation of the mediating mission of Gunnar V. Jarring, the United Nations representative for the Middle East, because the situation between Israel and its Arab neighbors "remains dangerous."

● They were pleased by progress in their plan to double the level of Soviet-French trade from 1969 to 1974 on a "reciprocally advantageous" basis, though they did not indicate how they would balance their trade which saw France ship the Soviet Union $341 million in 1971 but buy only $235 million in return.

● They looked forward to expanding cooperation in various fields including peaceful uses of atomic energy, high energy physics and space experiments, as well as continued exchanges of military visits.

The Soviet leader, Mr. Pompidou said, had accepted another invitation to visit France without setting a date. So far, Mr. Pompidou and Mr. Brezhnev have exchanged visits annually for the last three years.

Their communiqué indicated that European issues, especially the forthcoming force reduction talks, the proposed European security conference and possible relations between the West European Common Market and East European Comecon, had dominated the talks.

**Preparatory Talks**

The two leaders pledged to "bend every effort" to push ahead preparatory talks in Helsinki for a European security conference to be held "in the nearest months to come," their communiqué said. This was seen as increasing pressure on Washington, London, Bonn and other capitals disposed to move more slowly.

Then, taking direct issue with the American position that European force reduction talks should move parallel with the buildup to the European security conference, Mr. Brezhnev and Mr. Pompidou said:

"The Soviet Union and France proceed from the fact that an all-European conference should not be made dependent on any other negotiations and that it is a major, independent action of European and world politics."

*Demand Pledge of Responsiveness*

# Senate Democrats Eye Veto Of Balky Cabinet Nominees

By James M. Naughton

WASHINGTON, Jan. 12 (NYT). —Senate Democrats demanded yesterday that President Nixon's nominees to the cabinet pledge, "as a prerequisite to confirmation" by the Senate, that they would appear before congressional committees to explain administration policies.

The demand by the Senate Democratic Caucus was the latest reflection of resentment among congressional Democrats over what they contend has been a policy of "remoteness" on the part of the President and his cabinet.

William P. Rogers, the Secretary of State, and Henry A. Kissinger, the President's adviser on national security, refused to appear before the Senate Foreign Relations Committee last week to give an accounting of Mr. Nixon's efforts to end the Vietnam war.

Two nominees for the new cabinet — Elliot L. Richardson, the President's choice to be secretary of defense, and Claude S. Brinegar, designated as secretary of transportation—were reluctant in confirmation hearings earlier this week to give their personal views on key administration policies.

**'Secrecy' Assailed**

Sen. Lloyd Bentsen, D., Texas, said that the resolution was directed at "secrecy and remoteness on the part of the cabinet and the chief executive."

"We want to understand the rationale and the logic behind *decisions*," Sen. Bentsen added.

It was not immediately clear whether the Democratic demand would have any practical effect, beyond giving the White House another notice that the senators were dissatisfied with the administration's attitude toward Congress.

The caucus resolution was directed to Democrats on Senate committees that will examine the qualifications of six cabinet nominees and about 30 candidates for sub-cabinet positions. It told the senators to give the full Senate a report on the nominees' "commitment to respond to requests to appear and testify before duly constituted Senate committees."

But the resolution did not spell out what might occur if the committee Democrats' evaluation were unfavorable. The resolution noted that members of the administration "have refused on occasion to appear and testify."

**Money Pressure Eyed**

Sen. Alan Cranston, D., Calif., and Sen. Gale McGee, D., Wyo., suggested that the Democrats could attempt to withhold appropriations from departments that were not responsive to congressional requests for information.

Sen. McGee said that he had voted for the policy resolution but that "we have to take far more drastic measures and force the issue with the President" to stop such practices as the refusal by the administration to spend funds appropriated by Congress.

The resolution adopted yesterday did not deal with the issue of "executive privilege," under which White House aides can refuse to testify on their roles in development of the President's policies and programs.

Sen. John C. Stennis, D., Miss., sought to amend the resolution to have it call for a written explanation from the President when executive privilege is invoked, but his amendment was defeated by a vote of 19 to 17. The Senate Democratic leader, Mike Mansfield of Montana, said that the issue of executive privilege should be taken up separately at a later date.

## *Three Officials Of Pentagon Resign Posts*

WASHINGTON, Jan. 12 (AP). —The White House announced today that President Nixon has accepted the resignations of three more top Pentagon officials.

Press Secretary Ron Ziegler said Mr. Nixon expressed regret at the impending departures of: G. Warren Nutter, assistant secretary of defense for international security affairs; Gardiner L. Tucker, assistant secretary for systems analysis; and Robert J. Johnson, assistant secretary of the Army for research and development.

All three had served since 1969.

Mr. Nixon also accepted the resignation of Horace G. Torbert jr. as ambassador to Bulgaria, a position he has held since 1970. Mr. Ziegler said Mr. Torbert plans to retire from the Foreign Service.

The White House spokesman also disclosed that Chairman Russell E. Train of the Council on Environmental Quality will remain on the job, as will the two other members of the council, Beatrice E. Willard and John A. Busterud.

United Press International.

**MOVING IN—Newly elected Congresswoman Patricia Schroeder, D., Colo., is not practicing modeling but moving furniture into her new home in Alexandria, Va., where she will reside for, at least, the next two years. Husband James, in background, also lends a helping hand but in a more conventional manner.**

# McGovern Criticizes Press In Discussing His Defeat

BOSTON, Jan. 12 (AP).—Returning for the first time since the campaign to the only state he carried in the Nov. 7 presidential election, Sen. George McGovern, D., S.D., yesterday assailed the press coverage in talking about his landslide defeat.

At a news conference before a crowd of about 200 former campaign workers, most of them young, the South Dakota senator criticized both the press and the isolation of President Nixon in the White House.

The campaign workers gave Sen. McGovern a tumultuous reception, greeting him with standing applause and interrupting his remarks repeatedly to clap and cheer. He exhorted them *to put pressure on Congress to* withhold funding for the Indochina war and to implement other McGovern campaign policies.

"In reading the clippings of the national press coverage," the defeated Democratic candidate said, "I don't know how we got 29 million votes. The press was really very bad. The press picture [of himself] that emerged is really a very negative one. Many of the things I saw as personal strengths were interpreted as weaknesses."

**Eagleton Controversy**

His changes of direction on tax reform and in the controversy over running mate Sen. Thomas F. Eagleton, D., Mo., were "blown up to the extent that I was considered indecisive on everything," he said.

In comparison with most recent campaigns, he said, there were few candidates who "took more forthright stands on the hard issues than I did."

"Part of the problem," he added later, "was that the *press* was dealing with an almost unprecedented situation" in the refusal of President Nixon to campaign personally *and to face* scrutiny by the public and press.

"He didn't even want his name used," Sen. McGovern said. "He was really pitting the institutional prestige of the presidency against me.

"The press found it very difficult to cover him," he said, "and I was out there like a sitting duck."

He said his statement that he would back Sen. Eagleton "1,000 percent," after disclosure that the vice-presidential candidate had been hospitalized previously for treatment of nervous exhaustion, "was regarded as a horrible mistake, much worse than anything" that occurred in the GOP campaign.

"The point is I didn't kill anybody in my campaign, I didn't bomb anybody, I didn't steal any money, and none of my top aides were arrested for wiretapping," Sen. McGovern said.

"Somehow my mistakes were interpreted as more serious than the highly competent President who was tough and decisive," Sen. McGovern said sarcastically.

"While some of it was my fault, I think some of it the press is going to have to grapple with," Sen. McGovern told newsmen.

He told one questioner, "right now you're interrogating me, but you can't interrogate" the President. The remark brought cheers and applause from the crowd.

"You're not allowed to do that to our exalted leader," he said. "Even members of Congress aren't allowed to ask him questions."

**McGovern on Kissinger**

BOSTON, Jan. 12 (AP).—Sen. McGovern was quoted today as saying he believes presidential adviser Henry Kissinger "was lying" on Oct. 26 when he said that peace was at hand in Vietnam.

The Boston Globe said he made the assertion during a luncheon with Globe editors.

It said Sen. McGovern called Mr. Kissinger's statement a final factor in his election defeat.

"Of course, I don't know," Sen. McGovern said, "but I can only tell you that when Kissinger told the country on Oct. 26 that peace was at hand, only a few small details remained, I think he was lying.

"I think he knew that the President and Gen. [Nguyen Van] Thieu were not about to accept the agreement which he had tentatively reached with Hanoi."

Judge Hears Lawyers in Secrecy

# *More Guilty Pleas Rumored In Watergate Bugging Trial*

WASHINGTON, Jan. 12 (AP). —The trial of six men accused of burglarizing Democratic party headquarters was moved to a closed courtroom today amid speculation that there may be more guilty pleas.

U.S. District Judge John J. Sirica gave no reason for the surprise shift behind closed doors and warned the defendants and their lawyers of stiff penalties for anyone violating his orders for strict secrecy.

Judge Sirica later adjourned the court until Monday without explanation. He, the defendants and their attorneys were closeted for more than two hours before the judge called in the jury and announced the adjournment.

The closed session was called after all of the day's previous trial business had been conducted out of hearing of the courtroom audience and the jury before Judge Sirica.

There had been speculation around the U.S. Court House, where the trial is in its fifth day, that some or all of the six *remaining defendants* wanted to follow the lead of E. Howard Hunt jr., who pleaded guilty to six counts yesterday.

A Utah college student has testified that he met weekly with Mr. Hunt, a former White House consultant, to exchange intelligence reports on Democrats for envelopes full of money.

Thomas Gregory, a student at Brigham Young University, said he was paid for infiltrating the headquarters of Sen. Edmund S. Muskie and Sen. George McGovern, candidates for the Democratic presidential nomination.

Mr. Gregory testified that he was recruited by a friend who was soliciting agents to spy on Democratic organizations. He said a man identifying himself as E.L. Warren paid for his plane ticket to Washington from Provo, Utah, and gave him his first assignment of infiltrating the Muskie camp. He identified "Warren" as Mr. Hunt.

## Severe Drought Affects Turkey

ANKARA, Jan. 12 (AP).—A severe drought affecting large areas of Turkey has forced authorities to ration drinking water in several cities, including Ankara and Izmir.

In eastern Turkey, other cities are being supplied with water by tank truck, authorities reported.

The lack of rainfall since November also is damaging crops —a serious problem for this country where two-thirds of the population depends on farming.

## N.Y. 'Gay' Group Wins Right to Organize

ALBANY, N.Y., Jan. 12 (AP).— New York's highest court ruled yesterday that a homosexual group could incorporate in the state under the name of "Gay Activists Alliance."

The group wanted to organize homosexuals to seek the repeal of certain laws. The decision of the Court of Appeals overturned the ruling of New York secretary of State John P. Lomenzo.

# Flu Deaths Exceed 600 in U.S., With Epidemic in California

ATLANTA, Jan. 12 (AP).— Reports from 122 cities show that more than 600 deaths associated with pneumonia and influenza were recorded last week, the National Center for Disease Control said today.

A report from California said an outbreak of "English" flu there had reached the proportions of an epidemic.

The Atlanta center said 639 deaths were reported nationwide for the week ending Jan. 6, 84 more than normally expected. However, the center said some of the deaths were delayed reports, and the actual total for the week may be less.

The report includes 10" deaths in New York City, for example, but some of these were from the preceding week.

The CDC is using public health reports from the 122 cities as an indicator of the severity of the outbreak of "English" influenza.

Dr. Robert J. Rubin, an epidemiologist at the center, said, "We expect to have a good indication of the magnitude of the problem within the next week or two."

For the previous week, ending Dec. 30, the CDC had reported 467 flu and pneumonia deaths— 73 fewer than expected. The virus has been reported in 18 states.

**California Outbreak**

Dr. James Chin of the California Health Department in Berkeley said, "Clearly, northern California, and especially the San Francisco Bay area, had an epidemic of flu which peaked in the first week of January. We're now starting to get reports that central and southern California are getting involved."

Dr. Chin cited partial statewide death figures for flu or pneumonia based on death certificates taken from 11 major cities.

In winter, the state averages 30 to 50 deaths a week from flu and pneumonia. In the first week of January, health officials expected 42 but actually had 57—two below the "threshold of an epidemic," Dr. Chin said.

This is far below the 1968-69 outbreak of Hong Kong flu in the state, in which 150 to 160 deaths were recorded during the peak week of a four-to-six-week epidemic, health officials said.

"We're having a lot more influenza this year than in the last couple, but that's because it's a new virus," Dr. Chin said. "In terms of a number of symptoms, it's identical or even less severe than the Hong Kong flu."

Other states where "English" flu previously was reported include New York, Maryland, Hawaii, Arizona, Colorado, Kansas, Texas, Pennsylvania, Massachusetts, Connecticut, Tennessee, Illinois, Washington and New Jersey.

The CDC monitors 122 cities, from which it obtains reports on influenza and pneumonia.

**WHO Reports No Deaths**

GENEVA, Jan. 12 (AP).—An epidemic of influenza that spread to several countries this week was described today as mild and without apparent fatal cases by a spokesman of the World Health Organization.

He said the disease—the benign "A" type virus—spread from the Soviet Union and reached epidemic proportions in Romania, the Yugoslav province of Croatia, France, Britain and Trinidad and Tobago, with only sporadic occurrence in other countries.

He said the organization so far has had no reports of deaths as a result of influenza.

Some Programs Cut, Others Added

# *Nixon Education Budget Said to Involve Shifts*

By David E. Rosenbaum

WASHINGTON, Jan. 12 (NYT). —President Nixon's education budget for the next fiscal year will propose the elimination or phasing out of many education programs that are popular, according to reports and documents reaching Capitol Hill.

Many other existing programs would be sharply reduced under the proposed budget, and no funds have been allocated for some new programs that Congress approved last year.

The biggest cuts are scheduled for programs in elementary and secondary education. Spending for higher education would be slightly increased in the next fiscal year, and a new program of scholarships for low and middle-income college students would be funded fully. But no money would be allotted under Congress's 1972 program of direct grants to colleges and universities.

The drafting of the budget for fiscal year 1974, which begins July 1, is so far along that it is highly unlikely that the figures in the reports and documents will be changed significantly before the budget is published at the end of this month.

The documents indicate that the President will once more ask Congress to enact special revenue-sharing for education. Under this approach, most existing categories of federal aid would be consolidated and the states would be given one broad federal grant. The special revenue-sharing proposal went nowhere in Congress after Mr. Nixon proposed it last year.

**$5-Billion Total**

Spending by the Office of Education would total close to $5 billion during fiscal 1974, about the same as the estimate for the current fiscal year. But the outlays would be shifted so that some programs would be eliminated entirely and others would be cut back.

At least two programs under the Elementary and Secondary Education Act of 1965 would get no money in fiscal 1974.

One of these—aid for the creation of experimental and innovative programs under Title III of the act—is costing $126 million in the present fiscal year.

The other—money to improve state education agencies under Title V of the act—costs $21 million this year.

The budget also would propose the abolition of all federal aid to libraries. The government is spending $90 million on libraries in this fiscal year.

The budget also would end public schools' assistance based on the number of students whose families work on federal property but do not live there.

The budget would continue to give communities aid based on children who live on federal property, but the recommended cuts in the other part of the program would amount to $123 million.

The budget also proposes a cut of $100 million—a 20 percent reduction—in funds to the states for vocational education.

The recommended budget includes nearly $1 billion for a new program of federal scholarships for college students, a program that Congress enacted last year.

Under this legislation, a key proposal of the Nixon administration, each college student would get from the federal government a theoretical allowance of $1,400 a year, minus the amount that his family could be expected to contribute towards his education. The grant could not exceed 60 percent of what a student needs to attend his college. Most students from families with income less than $13,000 a year could get some money under the program.

The budget documents appear to contain no money for the loan program under the National Defense Education Act.

The recommended budget contains no money for the annual allocation to land-grant colleges and none for the program of foreign-language and area studies.

# American Ex-Nun Is Held in Bolivia As a Subversive

NEW YORK, Jan. 12 (NYT).— A former American nun, arrested in Bolivia for belonging to a subversive organization, has been held in jail for more than five weeks because she will not reveal the identities of other members of the group.

Mary Harding, 40, of Fairhaven, Mass., who went to Bolivia as a Maryknoll sister in 1959 and resigned from that order in 1970, has admitted that she is a member of the Army of National Liberation, founded by Che Guevara in 1967. According to the State Department, Miss Harding was arrested Dec. 5 while on the way to her English-teaching job at the American Cultural Institute. When offered freedom in return for information on others in the terrorist group, she said she would never give such information.

Friends here from Bolivia who try to stir interest in her case say that Miss Harding told a priest who visited her in jail that she had been beaten with a hard-rubber mallet during the first 72 hours after her arrest.

Juan Jose Loria, minister consular of the Bolivian Embassy in Washington, said reports that Miss Harding was beaten were "clearly not true." He confirmed that she was being held, "because she has to conform to our laws as any citizen," but said he had no information on the possibility of her release.

"We have no information to substantiate that she was beaten" said Jack Binns, Bolivia Desk officer in the State Department. "Our consular officer asked her if she has been mistreated and she said she had not."

# *Atlantic City Decides It Will Allow Monopoly Names to Go by Board*

By Edward C. Burks

ATLANTIC CITY, N.J., Jan. 12 (NYT).—For millions of Monopoly players, those sentimental high-rollers of play-money capitalism, today was a victory for tradition and the underdog—for Mediterranean and Baltic Avenues.

Two local streets immortalized on 70 million Monopoly boards these last 37 years got a solid new lease on life. Their names will not be changed, the Atlantic City Commission decided.

All streets on Monopoly boards are named after actual streets in Atlantic City. Although Mediterranean and Baltic are the most inexpensive properties on Monopoly boards—and rather drab in real life—the announced plan to rename them brought on an avalanche of protests from across the continent.

Many protests not only called Mediterranean and Baltic Avenues a major part of American tradition but singled them out as symbols of the underdog.

After a 20-minute public hearing at City Hall, while television cameras rolled, the city's commissioner of public works, Arthur W. Ponzio, original sponsor of the name change idea, reversed himself and urged that his bill be killed immediately. It was, unanimously, by the five-member commission of which he is a member.

Why had Mr. Ponzio undertaken this name change plan anyhow? He explained that it was "part of upgrading our city to jibe in with the new gambling casinos" that may be authorized by the voters in a referendum next fall.

Edward Teller

# Teller Urges End to Secrecy On Science Data After Year

WASHINGTON, Jan. 12 (Reuters).—Dr. Edward Teller has proposed that government scientific secrets, including defense information, be made public after one year.

In an interview in the Johns Hopkins University magazine, the physicist said: "After a year, I believe that most of our secrets are found out by the Russians anyway, specifically in science and technology.

"...I am against secrecy because, among other things, it impedes the development of American science and American defense."

He said the Soviet Union was ahead of the United States in nuclear weapon development, where U.S. secrecy was the greatest.

"They're not ahead of us because of one of those spies," he said. "They are ahead of us because their scientists are forced to work as they are forced to do everything else. Our scientists abstain from work that is classified."

**First in Computers**

By contrast, he said, the United States was ahead of the Russians and everybody else in computer science—which was not secret—and this had extremely important defense applications.

The only type of information Dr. Teller said should be kept secret was that which only a few people needed to know, such as the location of nuclear submarines. In such cases, no secret documents needed to be issued, as the information could be shared in personal confidence, he said.

Another benefit of a one-year rule on secret documents was that it would deter those who want to use secrecy for political gain, he said.

**Thailand Canal Mission**

BANGKOK, Jan. 12 (AP).— Dr. Teller arrived here yesterday to discuss a preliminary survey on whether nuclear excavation is possible in cutting a canal across the Kra Isthmus in southern Thailand.

Dr. Teller will talk with Thai, canal proponent Chow Chowkwanyuen and officials of the engineering consultant firm of Tippets Abbott-McCarthy-Stratton here during his six-day visit.

The survey will take about six months at an estimated cost of $500,000. It will take into consideration whether it is feasible to apply results of the Plowshare project on peaceful uses of nuclear energy to build the Kra Canal, which will connect the Indian Ocean and the South China Sea.

Plowshare was launched by the U.S. Atomic Energy Commission in 1957 when the United States contemplated the use of nuclear energy to cut a sea-level canal across Colombia in Central America.

Dr. Teller said that there is need for caution in the approach to the project so that it may be determined whether it will be feasible and whether there may be better alternatives.

# *U.S. Now Decides Localities Can Regulate Aircraft Noise*

By John P. MacKenzie

WASHINGTON, Jan. 12 (WP). —In a policy reversal, the Transportation Department has concluded that local governments are free to combat noise pollution by placing curfews on nighttime takeoffs of jet aircraft.

This supersedes a stand taken by the Federal Aviation Administration, and most of the aviation industry, that federal regulation of air transportation left no room for tough noise-abatement rules by localities.

The shift, the result of a "thorough review" promoted by court cases, was disclosed yesterday in a brief filed with the Supreme Court. Solicitor General Erwin N. Griswold and General Counsel John W. Barnum of the Transportation Department told the court that Congress has not displaced state and local authorities in the fight to reduce noise pollution from jets or other sources.

The brief marked the federal government's re-entry, as friend of the court, in a dispute between the city of Burbank, Calif., and Lockheed Air Terminal, Inc., owner of the Hollywood-Burbank Airport on the edge of Los Angeles.

The airport owner—supported by the Air Transport Association, representing the nation's major air carriers, and the National Business Aircraft Association— went to court two years ago to challenge a Burbank ordinance forbidding all jet takeoffs between 11 p.m. and 7 a.m.

**Hearing in February**

Lower courts were persuaded that the local law was in conflict with national transportation policy as reflected in decades of federal legislation. The city took the case to the high court and was granted a hearing scheduled for next month.

The FAA supported the airport interests in the lower courts but, according to yesterday's brief, the FAA's Transportation Department superiors have concluded otherwise.

"There simply is no general federal policy in favor of night flights by jet aircraft over densely populated residential districts irrespective of environmental consequences, nor is there any such specific policy applicable to Burbank," the brief said.

The brief said that the FAA had the legal power to issue noise-abatement directives to airports across the country but that, until that happens, there is considerable leeway for local regulation.

The government's new position would only give cities and counties increased dominion over their airspace if those jurisdictions had control over the airports involved. Thus, the government said, efforts by neighboring jurisdictions to block specific flight patterns or hours of operation would continue to be rejected in the courts.

According to the brief, local control should not be permitted to become a burden on interstate commerce. But it noted that while many business aircraft were affected by the ordinance, only one scheduled passenger airline departure a week was affected.

## 49 Families Get Damage Awards For Airport Noise

LOS ANGELES, Jan. 12 (AP).— Forty-nine families living near Los Angeles International Airport have been awarded $365,700 for damages caused by jet airline noise.

A Superior Court jury deliberated for 13 days before deciding Wednesday that seven other families were not entitled to any payment from the city because their homes were too far from the airport to be greatly affected.

The ruling settled a suit originally brought by about 100 families who said the noise damaged and devalued their property and harmed their health.

During the course of the court proceeding, the city agreed to buy 39 of the homes and Superior Court Judge William H. Levit ruled that six of the properties were too far from the runways to suffer any loss of value from noise.

Still to be tried on Feb. 14 are the claims of 11 families that airport noise, fumes and vibrations have caused them serious personal injury and annoyance.

## Leary Takes Part In Film on Drugs

VIENNA, Jan. 12 (UPI).—Timothy Leary, who broke out of a California prison in 1970, while serving a term for smuggling marijuana, has participated here in an Austrian documentary film about "hard" drugs, an Austrian movie director said today.

Michael Brauner, director of the "Vienna Film Collective," said Leary took part in a film that shows the ill-effects of taking hard drugs.

"Leary explains in our film why some young people take hard drugs," Mr. Brauner said. "He also comments on society's attitude toward drug addicts. We included his statements in our film it would be wrong to say he played a leading part in it."

## Major Pittsburgh Fire

PITTSBURGH, Jan. 12 (AP).— A fire, fueled by explosions and fanned by a brisk wind, swept a three-block warehouse and residential area in the city's Lawrenceville section last night. One fireman was injured. Many residents were evacuated from their homes in the area.

## Jury Gets Case In Mass Murders

FAIRFIELD, Calif., Jan. 12 (AP).—The mass murder case of Juan Corona, charged with hacking to death 25 farm workers and burying them in crude graves in an orchard, went to the jury yesterday after final prosecution arguments.

Defense attorney Richard Hawk, claiming that the prosecution botched the case and arrested the wrong man, completed his closing argument Wednesday. He called the case "a dark and dismal chapter in law enforcement history."

Mr. Hawk said the elaborate chain of circumstantial evidence against Mr. Corona contains at least nine separate links in which sufficient "reasonable doubt" exists to require an acquittal.

## Three Sentenced To 25 Years Each In U.S. Drug Case

NEW YORK, Jan. 12 (AP).— Two Frenchmen and a Mexican citizen, described as "top-echelon participants in the international narcotics traffic," were sentenced Wednesday to 25 years in prison for possession of heroin.

Judge Lawrence W. Pierce sentenced each of the three to the maximum of 15 years on a conspiracy charge and 10 years on a possession charge. The terms are to run consecutively.

Testimony in the trial, which ended Nov. 18, indicated that the three had attempted to smuggle 264 pounds of heroin—which it was said would have produced $60-million gross revenue for U.S. drug pushers—into the United States from Europe.

Gilbert Bornsztejn, 40, said to be a Paris art dealer, and Enrique Barrera, 50, a Mexican national who lived in the United States, were fined $50,000 each in addition to the prison sentences. Given 25 years without a fine was Richard Ben Sadoun, 30, of Paris, who was described as the treasurer for the heroin shippers.

Jesus Jorge Enriquez, 35, a Cuban who came to this country 12 years ago, was sentenced to 12 years in prison in connection with the case.

# Behind the Rift With Sweden

The current diplomatic rift between the United States and Sweden is disturbing in itself and even more disturbing in what it portends for the leadership role which Mr. Nixon would have this country take after the war. Mr. Palme, the Swedish Premier, has a long record of vigorous open opposition to American policy in Vietnam. To protest one of his gestures, Mr. Nixon did not replace the American ambassador who retired from Stockholm last summer. In response to Mr. Palme's latest outburst, an extravagant statement placing the Christmas bombing of Hanoi among the century's worst "atrocities," the President responded even more sharply. There is no record that he attempted to explain to the Swedes the purpose of the latest bombing, any more than he has to Americans. But he did tell Sweden not to replace its retiring ambassador. "We might as well face it," a State Department official thoroughly caught up in the Nixon spirit said, "we are dealing here with an unfriendly country."

This is, of course, nonsense. That an American diplomat could apparently believe it suggests just how far the Nixon administration has gotten out of touch with the rest of the world. For Sweden is anything but an unfriendly country. It is, in the natural scheme of things, a close friend sharing the deepest associations and values with the United States. It is also, obviously, a country whose leader along with a substantial portion of its citizenry, happens to disagree with a particular American policy. But the way to cope with a friend's disagreement is, at the least, to get in closer touch, to try to explain, not to react in pique and close off the symbolic channel of communication between nations, the exchange of ambassadors. Passing off political disagreement as an expression of calculated hostility is simply wrong-headed.

Here we introduce a point so obvious as to be almost embarrassing to have to make. It was not Olof Palme's words that shot almost a score of B-52s out of the skies of North Vietnam during the December raids: It was missiles supplied to Hanoi by the Soviet Union. The two million signatures Mr. Palme is trying to rally for an end-the-bombing petition are not killing South Vietnamese: The bullets sent to the Viet Cong by the People's Republic of China are. Yet Mr. Nixon keeps his ambassador in Moscow, and Moscow's envoy stays in Washington. As with the Russians, he continues efforts to broaden ties with the Chinese. How can the President countenance this measure of illogic in his policy?

The Swedish attitude—which is, let it be noted, shared in some more or less considerable degree by practically every friend the United States has—expresses essentially, we think, the bafflement with which so many people everywhere view the extended and continuing American involvement in Vietnam. The attitude may not arise so much out of compassion for the Vietnamese, or hostility to Americans, as out of cold self-interest. Mr. Nixon would like the American stand in Vietnam to be seen by friend and foe as a testament to the United States' devotion to an ally and to its dedication to the principle of national self-determination. But many people in many lands see the American stand as evidence that the United States has lost its balance and undermined its own penchant and capacity for a leading world role. Many foreigners—not all, to be sure—look at the United States and see a nation harshly divided within itself, one whose will and readiness to make good on other international commitments have been put in shadow by its costly and disproportionate involvement in Vietnam. From the viewpoint of their own self-interest, they must necessarily wonder if and how the United States has been changed by the war, and whether it is wise to count on the United States in years ahead.

This is to us the real issue involved in President Nixon's reaction to Olof Palme. We cannot conceive how it is to the President's or the country's advantage for him to pursue his particular line of response.

THE WASHINGTON POST.

# Compounding Confusion

As peace talks continue in tight secrecy in Paris, public confusion over the administration's objectives in Indochina has been compounded by the conflicting testimony of Defense Secretary Melvin R. Laird and his designated successor, Elliot L. Richardson.

Mr. Laird told the House Armed Services Committee this week that "the South Vietnamese people today, in my view, are fully capable of providing for their own in-country security against the North Vietnamese." The successful completion of Vietnamization, he said, "makes possible the complete termination of American involvement in the war, contingent always on the safe return of American prisoners of war and an accounting for those missing in action throughout Indochina."

This high-level evaluation immediately raised two questions: If the only conditions for complete American withdrawal are return of the prisoners and an accounting of the missing, why did President Nixon refuse to sign the accord reached in Paris last October since that agreement appeared to fulfill these basic objectves? If the South Vietnamese are now fully capable of defending themselves, why are American forces still heavily engaged over South Vietnam and part of North Vietnam?

After Mr. Richardson told the Senate Armed Services Committee two days later that he agreed with Mr. Laird's position, Sen. Nunn, Democrat, of Georgia, expressed the frustration of many when he observed: "I'm having trouble understanding the difference between this [Laird's] position and those [in Congress] who want to cut off funds for the war."

Pressed by Sen. Nunn, Mr. Richardson then conceded that the administration has "other objectives." Vietnamization, he said, "leads to a point where the United States is justified in removal of its own forces. So it is satisfactory for the United States. On the other hand, it remains unsatisfactory if the peace in the area is not achieved."

Where does that leave us? Withdrawal is justified, but the administration won't withdraw. Return of the prisoners is the condition for withdrawal but when prisoner return is offered there are "other conditions." The position is satisfactory for the United States but it is unsatisfactory. Peace is "at hand" but it isn't at hand. When will there be an end to this double-talk?

THE NEW YORK TIMES.

# Moscow Fears a Thaw

Pravda's senior foreign affairs commentator, Yuri Zhukov, is a frequent and familiar visitor in the West. Only a few weeks ago he made the latest of his many trips to this country and exchanged ideas with numerous Americans. When he is in Moscow he has full access to Western publications and he is a veteran member of the Soviet Communist party whose loyalty and discretion have been proven over and over.

The other day Mr. Zhukov used almost a half page in Pravda to express his alarm at the idea that the privilege of free foreign travel and free access to foreign ideas that he enjoys might be extended to all who live in the Soviet bloc. There are "hawks" in the West, he complained, who are talking about an "ideological thaw" between East and West that might bring really free communication between the peoples involved. Those preaching such ideas, he assures his readers, are only "conservative forces" in this country, and what they really want is Soviet "ideological disarmament before the offensive of bourgeois ideology."

Mr. Zhukov's pseudo-terror was of course concocted at the order of his Kremlin masters. The real aim of the Zhukov article was to quash hopes that the European security conference may lead to genuine freedom of movement of persons and ideas across the ideological frontiers. Mr. Zhukov's answer to that was an implacable "nyet." It is an answer motivated by fear of what will happen to Soviet ideas if exposed to free competition.

THE NEW YORK TIMES.

## International Opinion

### France and the Soviet Union

In terms of power politics, the United States undoubtedly occupies a superordinate position in the overall Soviet concept, although at the same time the leading spokesmen for the Soviet information and propaganda apparatus make no bones about the fact that they still regard France as the most important disruptive factor in the functioning of "Atlantism." At present Moscow's view of France's role has two main aspects: First, it is hoped that Paris will thwart Britain's military and political plans for Western Europe, and second, that France will pursue a course in the question of European collective security that will be more or less consonant with Soviet interests.

—*From Neue Zuercher Zeitung (Zurich).*

## In the International Edition

### Seventy-Five Years Ago

January 13, 1898

NEW YORK—Washington dispatches report the *suspension of negotiations with Denmark for* the purchase of the Danish West Indies. It is understood that the United States meantime holds the option of purchase on terms which will be acceptable to the Danish government. The rumor that the acquisition of Greenland by the United States has also been the subject *of discussion with Denmark is denied.*

### Fifty Years Ago

January 13, 1923

PARIS—Another scandal has developed in the case of Louis Phal, known as "Battling" Siki. The International Boxing Union, without giving any preliminary warning, announced in quite unruffled tones the decision of its emergency committee to deprive the Senegalese battler of the three boxing titles he now holds. This action is the result of the rough handling of Fernand Cuny, a powerful figure in French boxing circles.

*'To Tell You the Truth, We Can't Take Any More of That Bombing, Either!'*

# Private Belief and Nixon's New Cabinet

By James Reston

NEW YORK—The new Nixon cabinet is up before the Senate these days for confirmation, and more often than not, it is a painful sight. For the new boys, reaching for the most prestigious jobs of their lives, face the most *searching questions about what* they really believe, and somehow they have to try to be faithful to themselves and to the President who has nominated them, and to his policies, which they may or may not approve.

Elliot L. Richardson of Massachusetts, former secretary of HEW, former law clerk to Learned Hand and Felix Frankfurter, and now Nixon's appointee as secretary of defense, illustrates the problem. The senators surveyed him with skeptical courtesy.

What did he think of the Christmas bombing of Hanoi? In that room were senators on the bench and students and colleagues from Harvard who knew him back in the days when he could and did say what he thought privately about power and pity. But now he had a decision to make between his political ambition, his private philosophy, and his responsibility to the President who had nominated him.

### Backs Bombing

At first he stammered, until Sen. Hughes of Iowa inquired whether he was going to answer the hard questions straight, and he said maybe he wasn't, and *later decided to support the bombing*, risking the fire of the Congress rather than the ire of the White House.

He will be confirmed by the Senate—no doubt about that in the long run. He is an intelligent and experienced public servant, and the senators know from their own experience that life is a very complicated process between private conviction and public policy. But the problem still remains.

At what point do private conviction and public policy break? Under Secretary of State George Ball disagreed with Lyndon Johnson's Vietnam policy as much as Anthony Eden disagreed with Neville Chamberlain's appeasement policy in Britain before World War II, but Eden resigned on principle, and Ball stayed on in the belief that he could be more faithful to his principles arguing with the President inside the government than scalding him in the newspapers and magazines outside the government.

Henry Kissinger has an even tougher problem than either Ball or Richardson. Like them, he has been around for a long time. He is an historian and a teacher. His views on power, diplomacy, and politics are well known to his large company of friends in the press and in the university and political communities, and it would be hard to convince any of them who have known him over the last two decades that he approves the recent bombing of North Vietnam.

### Stays on in Paris

Yet he stays on in Paris and tries to do the best he can, and is vilified in the process by many of his best friends for doing so. Would it be better if he got out and slammed the door? And left the President to deal with the consequences of his resignation, which would reassure Hanoi? And turned the President over to the advice of John Connally, John Mitchell and Bill Rogers in the last critical phase of the Vietnam negotiations?

One remembers the day in the House of Commons when Eden broke with Chamberlain, and Duff Cooper resigned on the same fundamental principle that he couldn't serve a policy he opposed. And yet one wonders whether Kissinger and Richardson are in the same situation.

It might be even worse if Kissinger resigned on the bombing, and Richardson said he was against the bombing but wanted to be secretary of defense anyway. The bet here is that the public would support the President, and that Kissinger and Richardson would be replaced by men who would make a cease-fire in Vietnam even more difficult than it *is now.*

Even so, we are left with a highly unsatisfactory situation. The Senate has a constitutional responsibility to confirm the President's nominee for secretary of defense. It wants to know what Elliot Richardson thinks, for it will probably have to deal with him for four long years. But Richardson at first hesitates, and then supports the President, and leaves the Senate to confirm him, as it will, but with serious doubts.

This is not a new problem. Always men at the top of powerful institutions have had to deal with the conflict between what they believe to be "right" and what they believe to be best for the institution. And in the end, and increasingly over the last generation, they have swallowed their own beliefs and gone along with the institution.

Robert McNamara and later Clark Clifford went along for a while and then broke with the President on Vietnam—not openly but gradually, but their opposition was not really effective in changing the policy—it was too subtle and too late.

The chances are that Kissinger eventually will break with Nixon, *either if he finally manages to* negotiate a compromise, or if he doesn't. But meanwhile, he knows more about the intricate issues in the cease-fire negotiations, and more about the personality and psychology of Le Duc Tho than anybody else, so he is staying on during the last phase of the talks, and carrying out the President's instructions, and he is probably right.

For breaking now would probably be worse. The chances for a compromise, for reconciling the basic interests of North and South Vietnam, of the United States, China, and the Soviet Union, are probably better now than they are likely to be in the coming year or so in Southeast Asia.

So Kissinger is staying and negotiating, and since he has managed to create some sense of trust with Le Duc Tho, the chances are that he has a better chance of arranging a cease-fire than anybody else.

# *A Modest Proposal*

By Anthony Lewis

LONDON—Good firm penal laws being the foundation of a sound polity, only the knavish or peevish would complain of the object presently sought by that great figure of the American colonies, GOVERNOR ROCKEFELLER. He has asked for laws condemning all who deal in narcotic drugs to imprisonment for the remainder of their lives, with no compromise at their trial nor hope of relief from their sentence

Some captious souls not tuned to the liberal spirit of the age have, it is true, made mild objection. According to a dispatch from Albany, a state senator said he was "a little bit bothered" by the possibility that a "19-year-old son or daughter of any of us" would go to prison for life *for a first offense of selling a* small amount of drugs.

And eminent if shortsighted judges have protested that the state might run out of room for prisons if thousands were condemned every year to life terms. *The honest citizen might indeed* ask, "Are there no workhouses?"

### 244 Years Ago

These objections are mechanical, hardly going to the governor's noble principle. But if the principle can be saved and the objections disposed of, why, all the better. I therefore do humbly offer for public consideration a Proposal I first made, in another context, 244 years ago.

A very knowing gentleman of my acquaintance in New York advises that a felon is a most delicious, nourishing and wholesome food, whether stewed, baked or boiled, and I have no doubt that the meat will equally serve in a fricassee or a ragout.

My Proposal is that all those duly convicted of trafficking in dangerous drugs shall be slaughtered for food. Painless methods would of course be used. And in consideration of the saving on upkeep of a prisoner, the state would pay a bounty of $100 to the felon's family.

The advantages of this scheme are obvious and many. Economy is the first: Our hard-pressed government would be spared the expense of new prisons. It would profit from the sale of the carcasses, and perhaps assist the national balance of payments with a new export trade.

Secondly, society will have taken a useful step against the population explosion. It is well known that criminals are among the most dangerously prolific breeders.

Thirdly, the Proposal, if carried out, will be an ingenious device against the rising cost of food. It should especially benefit the lower orders, unless the rich develop a taste for the new dish and drive up the price as they have that of salmon.

Fourthly, and most weightily, there would be the spiritual advantages. Those found guilty of trading in narcotics would not be condemned to an endless, miserable life in prison. Instead, they would go with a clear conscience, knowing that they had bequeathed a final benefit to their loved ones and made a contribution to society.

As is ever the case, the foolish tender-hearted in our midst will doubtless object that this is a drastic measure. So it is. But everything else has been tried, and I am convinced that nothing else will do.

The liberal-minded ROCKEFELLER has himself said that this is a time for "brutal honesty" and "those stern measures that common sense demands." And the Governor was speaking, as he said, "with love as our guiding principle."

### Conform the Courts

There may be judges afraid to hear the unavailing cries for mercy of the convicted men and women. I say to them: Find some less demanding and less responsible profession. We must conform our courts to the needs of society, not society's need for protection to the needs of the court.

I am not so violently bent upon my own thought as to reject any other which shall be found equally innocent, cheap, easy and effectual. But let no man talk against it unless he make a hearty and sincere effort of his own.

The Proposal follows my recommendation of 244 years ago, alas neglected, to solve the problem of impoverished children in Ireland. If we seize the opportunity now, we can go on to equally constructive remedies for the wars in Asia. But I leave that to the well proved wisdom of higher authorities.

—JONATHAN SWIFT.

# Letters

## Buckley on Truman

In his rather woebegone attempt to toss a couple of soft plastic darts at the oaken structure of Harry Truman's memory, William Buckley jr., (IHT, Dec. 27) rather unwittingly hints at a parallel which might bear some scrutiny.

Arturo Toscanini, of course, was neither ascetic nor aristocratic, as Mr. Buckley suggests. He was the son of Italian peasants, and a great lover of wine, women and song, not necessarily in that order. His great gift was in the application of his very special innate genius and nothing more nor less spectacular than a zealot's dedication to doing his homework to make him more knowledgeable of music than probably any other human before or since. His interpretations were a unique combination of consecration to basic principles and an undeniable inner fire which illuminated all who performed with him and those of us who were privileged to listen.

Harry Truman might also be described with that somewhat patronizing phrase "man of the people," usually employed by those who apparently consider themselves something beyond merely human. Neither his antecedents nor his style are in question when the final measure of the man is taken. The important fact was that he faced some of the most nagging decisions of human history and emerged with a batting average probably unequalled in the course of the U.S. presidency.

DONALD ARTHUR.

Munich.

William F. Buckley concluded (IHT, Dec. 27) that "Harry Truman made grievous mistakes, but it is not his mistakes that are singled out for criticism, but his triumphs." Strangely enlisted in Mr. Buckley's panegyric of Truman triumphs is the most singled out for criticism, by those "ideological egalitarians... in control of the history factories" to wit: The destruction of two civilizations by a thing, once new, called peace-table bombing. Interestingly enough, back then (as well as now) the yellow infidel proffered a conditional surrender, unacceptable of course to the unconditional mind of the Great Khan in Washington; that condition being only the retention of the emperor. But as we all know, the A-bombs were dropped, the heathen converted to American will and, as a last cruel irony—the emperor was retained.

JOHN ROBINSON.

Edinburgh.

## Presidential Power

Clearly The New York Times' editorial "The President's Power" (IHT, Jan. 8) notes the most important crisis facing America today. Presidents have been usurping power for decades.

Perhaps it is the straightforward simplicity of the fact that discouraged The Times from including this in the editorial: The President is the head of the executive branch of the government; he should not legislate; he should not judge.

When the presidency again returns to its normal (and constitutional) role of proposing, formulating, and executing laws and policies duly legislated by the Congress, the United States can abandon its current tug-of-war for power and return its attention to the national interest.

STEVEN I. GIVOT.

London.

# *Nixon Shows How Tough He Can Be*

By David S. Broder

WASHINGTON.—To the question which engendered much speculation before the election—what would Richard Nixon be like if he knew he were not going to be a candidate again—it is now possible to give at least a tentative answer.

He would be—no, he has been—the tough so-and-so. Beginning the morning after the election when he called in his cabinet members, thanked them for their help in the campaign and told them he wanted their resignations, the President has been cracking down on everyone within his reach.

He told the Congress what it could do with the extra water pollution money it had voted—and let the residents of Hanoi and Haiphong feel the full extent of his fury at the breakdown of the Paris talks; and he has disarmed the press whenever it has attempted to get close.

Those who have seen the President and emerged to tell about it describe him as implacable in his purposes. His budget message, they say, will tell the country flatly he is no longer willing to spend money on hundreds of categorical aid programs whose results he considers minimal. Congress insists on funding them, the consequences—in terms of higher taxes—will be its responsibility.

Similarly, in Vietnam, if Hanoi does not offer the kind of terms the President finds acceptable, the consequences will fall on them, Herbert G. Klein, the communications director of the administration, has said he "would not rule out any tactic," including resumption of the massive bombing, the President deemed necessary to protect American troops or to carry out the military objectives which are essential.

At the same time he's getting more muscular, the President has become more closed-mouth. The budget-cutting, the bombing, the stop-and-start negotiating pattern all are taking place without a word of explanation or justification to the Congress or the public.

Specially as regards the bombing, the White House attitude is that everyone—including the elected officials who share responsibility for financing the war and the citizens in whose name it is waged—have a duty to trust *quietly for the President to* provide the explanations in his own good time.

Mr. Nixon is quoted as telling the congressional leaders he has visited him last week that he is "fully accountable" for the decisions being made, and, as he has said on "Meet the Press," he will fully discuss them at a time and in a way that best suits the process of getting the peace."

### *Questionable*

It is the assumption that the President can be both tough and conciliatory—that one can turn the bombing off, the budget and the Vietnam tactics on their head in two months without so much as a word of explanation or a single press conference—that seems most questionable.

Whatever the power of the presidency, large enterprises and large decisions in a democracy are sustainable only if they are understood.

Mr. Nixon was on solid ground when he discussed the question in his press conference on March 4, 1969—the third press conference in his first six weeks as President.

He was asked: "In the light of the experiences of your predecessor," if he felt "you could count on American public opinion to support you if this war were to go on for months or years?"

He said "the American people are terribly frustrated about the war" and "would welcome any initiative that they thought could appropriately bring it to an end on some responsible basis."

"On the other hand," he added, "it is the responsibility of the President to examine all of the options that we have, and if he finds that the course he has to take is one that is not popular, he has to explain it to the American people and seek their support.

"I think," the President concluded, "I can perhaps be more effective in explaining what we are there, and also in keeping the American people informed as negotiations go on. I intend to do so."

That intention has faltered in the three months since the President let the people know "peace is at hand." The responsibility of "keeping the American people informed as negotiations go on," which the President recognized after only a few days in office, is now dismissed.

One cannot avoid the feeling that the tough Mr. Nixon may ultimately find he has made it tough for himself.

*First Killing in a Week*

# Aged Woman Shot Down in Belfast Street

BELFAST, Jan. 12 (AP).—A 76-year-old woman going to collect her pension died on a Belfast sidewalk today, the innocent victim of crossfire between British troops and guerrilla snipers.

Elizabeth McGregor was cut down after stepping out of her home in the Roman Catholic Ardoyne district.

She died soon after reaching a hospital. She had been hit in the head and groin, by high-velocity bullets.

Neighbors claimed that Miss McGregor was hit by fire from soldiers.

But the army, while issuing a statement deploring her death, said she was the victim of an exchange of shots with guerrillas of the Irish Republican Army.

**Resurgence of Violence'**

Miss McGregor's violent death—the first in Northern Ireland since Jan. 5—marked a resurgence in the province's violence following a lull after New Year's Day. In the last 48 hours, at least three bombs have exploded in Belfast while street fighting between troops and teen-agers has erupted in the capital and Londonderry.

In Belfast today, an off-duty policeman risked his life to carry a primed bomb out of a downtown bar. He took it to a parked car in a quiet part of town where it exploded 15 minutes later, causing only minor damage.

The bar is normally used by Belfast lawyers and newsmen.

At the same time, political leaders of the Protestant majority have taken a new hard line toward the British government in anticipation of its projected peace plan for the province.

This is expected before the end of March, according to political sources.

But former provincial Prime Minister Brian Faulkner warned in a speech last night that Protestants would "violently resist" any move in the British formula toward union between Northern Ireland and the Irish Republic.

**Lynch Back in Dublin**

DUBLIN, Jan. 12 (UPI).—Premier Jack Lynch said today that demonstrators in New York had failed to disrupt his American visit.

"In fact," he said on his return here, "they highlighted it and made it more newsworthy."

Mr. Lynch said his trip had been worthwhile and that he was satisfied that American industrialists considering investment in Ireland were reassured that it was safe to proceed.

# British Lawmakers Planning European Assembly Reform

LONDON, Jan. 12 (AP).—Members of Parliament are heading into Europe fired with the spirit of reformation.

Prime Minister Edward Heath has briefed his pioneering delegates to "shake up" the European Parliament at Strasbourg.

The Strasbourg assembly is portrayed in Britain as a toothless, dull chamber that merely rubber-stamps decisions made in Brussels, headquarters of the European Economic Community, by "Eurocratic" ministerial and civil service machinery.

Seventeen British Conservative party parliamentarians, headed by 44-year-old former newsman Peter Kirk, plan to change that.

Mr. Kirk, whose task force takes its place in Strasbourg next week, told newsmen in London yesterday that the European Parliament at present possesses greater powers than it realizes to affect the destiny of the refurbished continent.

The first priority, he said, is to liven up Strasbourg proceedings so that they attract more public interest in the nine community nations.

It could be the first small step, he indicated, toward direct European Parliament elections.

After the European Parliament's opening formalities Tuesday, Mr. Kirk intends to introduce a memorandum setting out preliminary thoughts "on the way in which business might best be handled in the immediate future."

The Parliament is made up of delegates named by Europe's political parties, in or out of power.

The British delegation wants fewer prepared speeches in the Strasbourg chamber, more spontaneous debate and instant discussions of reports submitted by the EEC Commission, the community's supreme decision-making body. It also seeks to have parliamentary committee meetings opened to the press.

Mr. Kirk said he had made a start already by persuading the authorities to allow an immediate debate Tuesday afternoon on the Community's economic situation and on economic and monetary union. With speeches limited to 10 minutes, debate should be lively, the British believe.

**Spontaneous Reactions**

Mr. Kirk said the object is to introduce the kind of spontaneous first reactions that are frequently aired in the British Parliament.

"The normal thing at Strasbourg is for an oral report to be translated and circulated and then debated four weeks later, after it has been through a committee. By that time, all spontaneity would have been lost. So this is the first British innovation," Mr. Kirk declared.

The British will not propose direct elections at this stage, although Mr. Kirk said he believes these must come "fairly soon." At the moment, he said, the people of Europe must be persuaded they have something worthwhile to vote for.

## Iran Disputes Report Of Defections to Iraq

TEHRAN, Jan. 12 (AP).—Iran's government today denied an Iraqi claim that an Iranian Air Force helicopter crew had defected to Iran and asked for political asylum.

Government spokesman Mahmoud Pourshalchi expressed "great surprise" at the claim. He said that the helicopter was on a rescue mission to help snowbound persons in western Iran and apparently flew over the border because of a navigation error.

However, there was no official word in Tehran on when the three-man crew might return home.

## *Prostitutes Shun Police Proposition*

NEW YORK, Jan. 12 (UPI).—Police, who have tried harassment, warnings, arrests and policewomen decoys in their battle against prostitution, have turned to a new weapon—leaflets suggesting that the girls quit the business.

"Aren't you tired of all this?" the leaflet, handed out to arrested streetwalkers, says. "Isn't it about time you gave yourself a break?"

The handout goes on to say ". . . Why go on like this? Is it because of some pimp who is using you—sexploiting you for his satisfaction? If you want to get out of this rat race, we can help you."

At the bottom of the leaflet are two phone numbers that the women can call for help and further information.

So far, police said, there have been no takers.

## Extortion Bid On French Train

MADRID, Jan. 12 (UPI).—The Paris-to-Madrid express train today arrived on schedule, with neither its crew nor most of its passengers being aware of a bomb threat.

A spokesman for National Spanish Railways said that the train's trip was "normal."

In Paris, police said that an anonymous caller threatened to explode a powerful bomb aboard the train unless he received a 500,000-franc ransom. A search of the train revealed no bomb.

## Arms Conference Resumes Feb. 20

GENEVA, Jan. 12 (UPI).—The 25-nation Geneva disarmament conference will resume negotiations Feb. 20, a week before the United States and the Soviet Union continue the second round of their bilateral Strategic Arms Limitation Talks, it was announced today.

United Nations officials said the resumption date was fixed by the Americans and Russians, the co-chairmen of the multilateral disarmament talks, which began in 1962.

The conference, which negotiated such treaties as the nonproliferation of nuclear weapons, the nuclear-free seabed pact and the ban on biological weapons, will center its attention on the outlawing of chemical weapons during the 1973 talks.

## Two U.S. Missionaries Expelled by Thailand

BANGKOK, Jan. 12 (AP).—Two American missionaries have been expelled from Thailand after serving a six-month jail term each for desecrating an image of Buddha, police have reported.

Joseph K. Wall and Kimball Larson, both Mormon missionaries stationed in Nakhon Sawan in central Thailand, were deported Tuesday, police said.

Mr. Wall was accused of sitting atop a 15-foot-high statue while Mr. Larson photographed him.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

MULTI-NATIONAL CARAVANING COMPANY
(U.S. owned) seeks for its Paris office a
MARKETING ASSISTANT
(ADVERTISING AND PROMOTION)
An adaptable and mature person is required with good marketing orientation and experience of advertising and promotion aspects.
At least two European languages (including English) required. Ability to handle projects independently within European marketing team.
Salary negotiable with a minimum of $8,000 per year.
Send replies to: Marketing Director, BOISE CASCADE (FRANCE), 54 Rue du Fbg. St.-Honoré, 75008-PARIS (France).

Stockbroking Appointment in London
Age: 24+
Total remuneration could be in the range £6,000-£8,000.
Our clients, who are one of the leading firms of stockbrokers in London, have an important vacancy for someone to specialize in European Stocks, in their large and expanding research department. The department provides sophisticated in-depth investment advice to a substantial number of institutional clients across a wide range of stocks.
—The successful applicant will be expected to have a good knowledge of European accounting and taxation procedures.
—He may be of Continental nationality with good investment experience. Alternatively, he may be a qualified accountant of British nationality, who has worked on the Continent for two or three years. He must be fluent in English and either German or French.
—Total remuneration could be in the range £6,000-£8,000. Prospects for advancement are very good.
Please send a résumé of your education, age, qualifications, experience and present salary (quoting ref. 554/IHT), to:
H. D. F. Marshall, Touche Ross & Co., Management Consultants, 27 Chancery Lane, London, WC2A 1NF.

MANAGER MARKETING SERVICES
We are looking for a highly-motivated administrator with plenty of initiative, for a well-established American industrial company operating internationally with factories in Europe. The successful applicant will have lived on the Continent of Europe and will be fluent in German and French as well as English.
Responsibilities will include:
—Co-ordinating advertising and public relations activities with the company's consultants and U.S. headquarters.
—Initiating and implementing all sales promotion literature.
—Trade shows and exhibitions primarily in Western Europe.
—Administration of relevant budgets.
The person selected will be responsible to the Marketing Manager and will be based at the European headquarters situated in the U.K. (Midlands). Considerable travel in Western Europe can be expected. The company will be prepared to meet all reasonable removal costs to its headquarters. Salary up to £3,500 p.a., in accordance with qualifications; other terms and conditions will be attractive.
Please write giving fullest possible details of experience to:
The Managing Director, HEWLAND, RUDER & FINN INTERNATIONAL LTD., 15 Albemarle Street, London, W1X 4QL, England.

INVESTMENT FIRM
HEADQUARTERS IN WESTERN SUBURB OF PARIS
seeks
YOUNG FINANCIAL ANALYST
having 2 years experience, interested in managing one or more foreign investment portfolios.
—Education: S.F.A.F. courses.
—Perfect knowledge of English.
—Knowledge of American market and preferably numerous other foreign markets.
—French national.
Write with C.V. and salary requirements to: PUBLIART, Ref. A 804, 16 Rue Guillaume-Tell, 75017-PARIS, who will forward.

LINGUIST
required by the
NETHERLANDS MINISTRY OF FOREIGN AFFAIRS
THE HAGUE
to translate texts on a wide variety of subjects into English and to edit English texts. Applicants should have been brought up in an English-speaking country, have studied languages at university level and have experience of editorial work and translation. The ability to read Dutch is essential.
Salary rising from £3,322, approx. to £5,025 p.a. Holiday allowance 7% of annual salary. Starting salary will depend on qualifications, age and experience.
Pension geared to cost of living.
Applications stating age, full particulars of education, qualifications, experience and posts held, should be sent preferably within three weeks to the
Rijks Psychologische Dienst, Prins Mauritslaan 1, 's-Gravenhage.
Please quote No. 2-5764/3121 in top left-hand corner of letter and envelope.

CHIEF ENGINEER
(Structural)
Multinational company (Brussels), leader in systemized roof and wall panel construction, seeks diploma engineer to head up all European engineering design activities. Should be familiar with the use of computers in design preparation and be able to speak German, English and French.
Will supervise and direct sizable staff of engineers and draftsmen. Company has rapid growth and the future is excellent.
Send resumé and salary required, in confidence, to: Box D-3.617, Herald, Paris.

EXECUTIVES AVAILABLE

## WASHINGTON

# Brazil's Radiant Colonial Art

By John Canaday

WASHINGTON (NYT).—Checking the catalogue of "Brazilian Baroque: Decorative and Religious Objects of the 17th and 18th Centuries," a radiant exhibition at the Renwick Gallery in Washington, I see that there are 86 objects in a show that impressed me as a small one. I'd have said 50 at most.

Part of the reason is that so many of the objects themselves are small. The entire exhibition is installed, without crowding, in two not-very-large rooms. But partly, too, the stylistic effulgence of everything from life-size sculptures, gilded and polychromed, to rosaries set with diamonds ties the whole show into an unusually compact visual unit.

The impression of unity is a contradiction in a way, since one stated purpose of the exhibition (which is sponsored by the Brazilian government) is to make clear that 17th and 18th-century sculptors and artisans in each of the provinces of Pernambuco, Bahia and Minas developed their local variants within the mother style of Portuguese baroque. These differences are present after you learn how to look for them, but anyone not familiar with Brazilian baroque must be conscious, first of all, that the three provincial styles share a common departure from the marvelously ornate, gleaming, glittering, half-ecstatic, half-agonized and altogether theatrical synthesis that was their source.

The departure is in the direction of awkwardness, sometimes very slight but always the hallmark of colonial art anywhere. By standards contemporary with their creation, colonial works of art were inferior to the home product to the extent that they failed to measure up to it exactly, but today these departures, involuntary though they may have been, are redeeming characteristics that individualize colonial art to make it an indigenous rather than a purely imitative expression. Colonial life was not the same as life at home; colonial art similarly differed.

The Renwick exhibition demonstrates that the technical level of provincial craftsmanship in Brazil was very high, yet there was always an involuntary chastening of the Portuguese exaggerations, an alleviation of its turbulence. The flying draperies are a little stiffened; the hysterical grace of the bands of sophisticated mystics is humanized here and there by an awkward proportion. Thus the distracting propagandistic thesis that makes most European religious baroque art suspect as a genuine emotional expression, even while it is most staggering as an aesthetic scheme, is diminished by a touch of provincial naiveté.

There is a good chance that this difference is exaggerated in an installation that, perforce, extracts the objects from the architectural synthesis with which they were originally integrated. And we might as well admit to more than a good chance that the mere knowledge that these are Brazilian objects affects our way of seeing them. There are none of the Indian elements that found their way into Mexican and Peruvian colonial art, sometimes to the extent of birthing a hybrid style; but the whole South American colonial adventure is such a fantastic story that our vision of any part of it is affected by our knowledge of the rest.

Of all those adventures, the one that took place in Brazil is probably the least well known. Its art is certainly the least well publicised. The present exhibition is made up of objects that have never before left Brazil. Pedro de Oliveira Ribeiro Neto, director of the Museum of Sacred Art in São Paulo (from which all the objects are on loan) organized the show with Lloyd Herman, administrator of the Renwick Gallery.

The exhibition is in part a diplomatic gesture celebrating 150 years of Brazilian independence. (If art of the colonial period seems an odd choice for such a celebration, the argument fades when we recognize whatever indigenous character the nominally colonial art took on.) But by an entirely different standard, this is an exceptional exhibition in that it is concerned with the one among all major art-historical areas that is most neglected in North American exhibitions today —Spanish and Portuguese baroque art and their colonial extensions, especially in sculpture. A recent excellent exhibition of colonial Peruvian painting at the Brooklyn Museum helped some. But in sculpture, we not only have had no exhibitions but have hardly any examples in our museums.

It should be a great field for reviving just now. The star of the Renwick exhibition is a life-size wooden gilt and polychromed figure of St. Peter enthroned as pope that, in its combination of astonishing realism and imaginative emphasis, could show a school of young New York neo-realists the direction out of a blind alley that is getting rather crowded.

## 3 Nations Planning Biggest Game Reserve

LOURENCO MARQUES, Mozambique, Jan. 12 (AP).—Portuguese authorities said yesterday that Mozambique, South Africa and Rhodesia have agreed to form the world's largest game reserve across their borders.

The reserve would have an area of 100,000 square kilometers, embracing Kruger Park in South Africa, the Ghona Rezhou National Park in Rhodesia, and Mozambique's Goerongosa National Park, plus another section of the Sul do Save area of southwestern Mozambique.

The New York Times

Rafael Ferrer and his "Fuegian House With Harpy Eagle" at the Whitney Museum. The eagle is drawn in cray

## New York: An Ice Escapade at the Whitney Bienni

By George Gent

NEW YORK (NYT).—Rafael Ferrer frostily exuded an air of easy confidence. The afternoon temperatures hovered in the mid-20s, and the ice house he was creating in the Whitney Museum of American Art's outdoor garden looked like it would not melt.

The ice sculpture, titled "Fuegian House With Harpy Eagle," was one of four large outdoor works decorating the museum's sunken garden at Madison Avenue and 75th Street for Wednesday's opening of the Whitney's Biennial exhibition of contemporary American painting and sculpture, which runs till late March. The other works are by Louise Nevelson, Alexander Lieberman and Michael Hall.

As with other artists invited to submit work to the biennial, an important survey which until this year took the form of an annual show, Mr. Ferrer submitted his work at the invitation of the Whitney. He paid for the materials himself.

"The ice will last at least through the exhibition," the 39-year-old sculptor said confidently. "I once did an ice sculpture in May, and it lasted 76 hours and 32 minutes. In this weather, there will be no problem. Whatever melting there is will only alter the form. This is a dynamic work."

### Crayon Drawings

The ice house, which is constructed of 25 ice blocks weighing 300 pounds each, looks li entrance to an igloo, em the floor within and arou strewn with dead leaves.

In the back Mr. Fe constructed the spiny bound together by red m on the concrete garden w hind the sculpture, he ha in white crayon a pict a large owlish-looking eagle."

Mr. Ferrer, who was b Puerto Rico but lives in delphia, where he teaches Philadelphia College of Art with many natural elemen he attributed his interest as a medium to its scar Puerto Rico.

## PARIS GALLERIES

29 Artists, Galerie Karl Flinker, 25 Rue de Tournon, Paris 6, to Feb. 10.

Moody, leather-covered monuments by Kalinowski, books ironically and imaginatively mistreated by Gojowczyk, hospital-sterile realism by Klasen and unrealism by Klapheck (who paints sleek and incomprehensible mechanical devices); pop by Richard Hamilton (portrait of Bing Crosby, etc.), allusive, understated drawings of male nudes by David Hockney, a wobbling laser beam by Reuterswärd, several works by Allen Jones whose subject is the female leg on stiletto heels—all this combines in one's mind into a cross-section of one aspect of current and recent art, something both chic and striking in which obsession is reflected in irony and both mirror one another into infinity.

* * *

Sol Lewitt, Galerie Yvon Lambert, 15 Rue de l'Echaudé, Paris 6, to Jan. 31.

Lewitt, the American minimalist, has drawn (or caused to be drawn) a series of circles on the walls of this gallery. These circles are traversed by lines that run through their center either horizontally, vertically or diagonally—or in combinations.

* * *

Romas Viesulas, Galerie Le Soleil dans la Tête, 10 Rue de Vaugirard, Paris 6, to Jan. 26.

Viesulas, who heads the graphic arts section at Temple University in Philadelphia, here presents works in black and white, both lyrical and formal, in a way that reminds one rather of chamber music with a rigid yet falling structure and occasional wild spurts of sound. One sees colorless relief on pure paper and pure black paper ers use both black and wh

Nam, Galerie Vercamer, 1 des Beaux-Arts, Paris Feb. 4.

Korean artist Nam is c ed with fading Oriental graphs, illegible, silent but ent nonetheless like an an weight. He treats them in rather sweet colors that c sensitivity and nostalgia.

* * *

Gilbert & George, Galerie abend, 12 Rue Mazarine 6, to Jan. 22.

Gilbert and George are o play themselves as two very erly dressed young Englis cum umbrellas who paint selves silver and stand on a in a gallery singing for ho end. The present show is n livened by their actual pe being mainly and a bit ou photographic, although the video tape (with bird sou apparently shows them s for hours on end amon shrubbery of a nicely English park.

MICHAEL GIB

## Smallpox Eradication Closer, WHO Reports

GENEVA, Jan. 12 (UPI).—The World Health Organization (WHO) today reported major progress in eradicating smallpox, with the disease now endemic in only six countries compared with 30 countries five years ago.

Although during 1972 there were an estimated 65,000 cases around the world, an increase of 23 percent over 1971, this was attributable wholly to more complete information from endemic areas, WHO said. During the last four months of the year, in fact, there was a 78 percent decrease in incidence in five major endemic areas. Continuing transmission of the disease, WHO said, is now restricted to Bangladesh, Ethiopia, India, Pakistan, Nepal and Sudan.

### ITALY

FLEMING COLLEGE FLORENCE

*Fleming College Florence is a two-year, coeducational college granting an A.A. degree. The College incorporates the Institute for European Culture, an interim pre-college or college year program. Based in Florence, Italy, Fleming College has an outstanding American and European faculty. Residence is available on or off campus. Research trips, a two-week stay in European homes, and exploration of Italy give an international dimension to all studies.*
*The College and the Institute offer courses in: English and Literature; Fine Arts, Studio Art, and Music; History and Political Economy; Philosophy and Psychology; French and Italian; Science, Economics, and Mathematics: Theatre Arts, Film, and Photography. The Theatre Department stages productions of plays in the theatres of Florence and other European cities.*

Write or call: Dean of Admissions, Fleming College Florence
6926 Montagnola-Lugano, Switzerland - Tel. Lugano 2 89 04.

ROME

JOHN CABOT INTERNATIONAL COLLEGE
(Affiliated to Hiram College, Hiram, Ohio)
*A Liberal Arts College offering courses in:*
- Humanities;
- Social Sciences;
- Physical Sciences.

ALL COURSES FULLY ACCREDITED
ALL CREDITS FULLY TRANSFERABLE
Experienced international faculty, on-site lectures, integrated study & travel-extra-curricular activities. *Summer session.*
FRESHMAN - SOPHOMORE PROGRAM
Admissions Office. J.C.I.C., Viale Pola 12, Rome, Italy. Tel.: 855.241.

AMERICAN COLLEGE OF ROME
*An independent non-sectarian two-year college.*
2-year curriculum in Liberal Arts & Business
(Accounting, Business Administration, Secretarial Science)
COEDUCATIONAL - DAY AND RESIDENT - TRANSFER CREDIT
Via XX Settembre 7/b, 00187 ROME. Tel.: 457.117.

### FRANCE

WANT TO SPEAK FRENCH?
You can do it in 4 or 8 weeks on the French Riviera.

TRUE SPEECH FLUENCY achieved by complete all-day immersion in all-French-speaking environment with specially trained teachers using the proven Institut de Français audio-visual methods and techniques. Course includes INTENSIVE class work, LANGUAGE LAB, discussion-lunch, situation sessions, film/debates, practice sessions, excursions. LODGING and MEALS included in tuition. Next course starts February 5, March 5, and all year. For beginners, intermediate or advanced, and all ages. "Note: Famous Nice Carnival is in mid-February." *Apply.*
INSTITUT DE FRANÇAIS—A-13.
23 Ave. Gén.-Leclerc, 06-Villefranche-s.-Mer.
Tel.: (93) 80.86.61.

ACP
A two-year liberal arts college with a superior teaching faculty, an independent study program, an international student body and a commitment to encourage personal and intellectual growth within a community of people and ideas. Our campus is Paris. Call or write. *We have more to tell.*
american college in paris 31 av. bosquet 75007 paris tel. 705.30.66

### BELGIUM

LANGUAGES INTERNATIONAL
Ave. Brugmann 160,
1060 Brussels. Tel.: 44-19-74.
RESIDENTIAL FRENCH COURSES IN BRUSSELS
1 to 5 weeks intensive French language training in the heart of the Common Market. Class-room lessons combined with outside activities guarantee a maximum result in the minimum of time.
Also available, regular private, twin or group tuition.

### SWITZERLAND

THE AMERICAN SCHOOL IN SWITZERLAND TASIS
Lugano M. Crist Fleming, Director
GRADES 7 THRU 12
Meets highest American academic standards. Coeducational. Small classes. Strong college preparation. College testing and guidance. AP courses. Outstanding, experienced faculty. Course correlated research trips. Skiing, sports, diversified activities. Boarding and day. American 7th and 8th grade program.
Write:
Director of Admissions—TASIS
6926 Montagnola-Lugano Tel: Lugano 2 89 04

FRANKLIN COLLEGE
Two-year Liberal Arts College in Southern Switzerland. A.A. Degree Program. Chartered in Delaware. Member of American Association of Junior Colleges. International Faculty. Small classes. Academic Travel in Europe and Africa. Credit Transfer to US colleges and universities. Cooperative agreement with Claremont Men's College.
Institute for European Studies, an affiliated one-year program, for the study of Contemporary Europe.
Ask for our catalog.
Franklin College, 6902 Lugano, Switzerland, Tel. 091 54 51 21

International Summer Camp MONTANA
Europe's top sports camp for boys and girls 8-17 years—riding stables, swimming pool, tennis, ice skating, summer skiing, alpinism, excursions, language courses, etc. Accredited member of ACA.
*For color brochure please write to:*
Rudy and Erica Sinder, Directors, CH-3932 Montana, Switzerland.

LA CHATELAINIE SWITZERLAND
International Boarding School for girls aged 14-20. FRENCH and modern languages. International enrollment representing 20 foreign countries. Pleasant social life. Preparation (CEEB) for leading Colleges and Universities. Small classes. Excellent staff. Summer and winter sports at finishing. Academic Year: September-June. Holiday Courses: July-August.
LA CHATELAINIE, CH 2072 St.-Blaise/Neuchâtel (French Switzerland).

# Male Vs. Female In 2 Exhibitions

...W YORK.—In a week when ...ne major New York art ...ition is called "Women ...e Women" (New York Cul... Center) and another is ... "Him" (Cordier & Eck... Gallery), it's going to be ... to avoid one more discus... of the role of sex in the ...discrimination against wom... ...ists, the differences, if any, ...en art made by women and ...made by men, etc.

...e I'm going to try. First, ...use both exhibitions come ...ped in their own text; al... that by Margaret Mead, ...cing the "Him" show, is as ...ineterable as that by Lucy ...pard, introducing "Women ...e Women," is debatable.

...ond, because the whole busi... bores me. Yes, I do think ... has been discrimination (I ... know of any myself, but ... I never tried to get an ...ition, and I'm willing to be... the experiences told me by ...s; statistics themselves prove ...ing, especially when they get ... to such absurd, niggling ... as that offered in a recent ...ey which pointed out, for ...ince, that a woman exhibitor ...ound to get a four-line review ...n a man exhibitor, less gift... gets seven lines). No, I *don't* ...k there are many—or any— ...onstrable differences between ... men and women artists do ... of a female "fondness for ...s and pastels and the ephem... cloud-colors" cited in the ...ard piece, among other pos... distinctions, is silly, when ... think of the peachypinks in ...ent work by de Kooning; so ... uniform density," if you ...k about Jackson Pollock; if ... ubiquitous linear "bag" or ...bolic form that turns in on ... Ferber, if" is female, what shall we ... Rico or *about El Greco's predilection* ...shapes suggesting wombs?)

### *Mixed Bag*

...m not exactly certain what ...t the "Him" show is making. I rather think the title served ... more than a device for ... gallery to gather, with more ...he taste that has consistently ...e its exhibitions remarkable, ...an extraordinarily handsome mixed bag of male images.

Not according to Miss Mead, however. "Man as object rather than as *subject*," she begins, "the choice of a pronoun for the title of this exhibition points to man as a member of a gender, rather than as the prototype human being. Man as subject acts, organizes, destroys, builds, has visions, and dreams dreams. Man as object stands in opposition to women, who bear him, rear him, cherish him, love or detest him ... The male's reproductive apparatus is on the outside of the body, vulnerable, betraying states of arousal or unresponsiveness ... But the creative life of a woman goes on inside her body ... Half dressing a woman demeans her, half undressing a man demeans him ..."

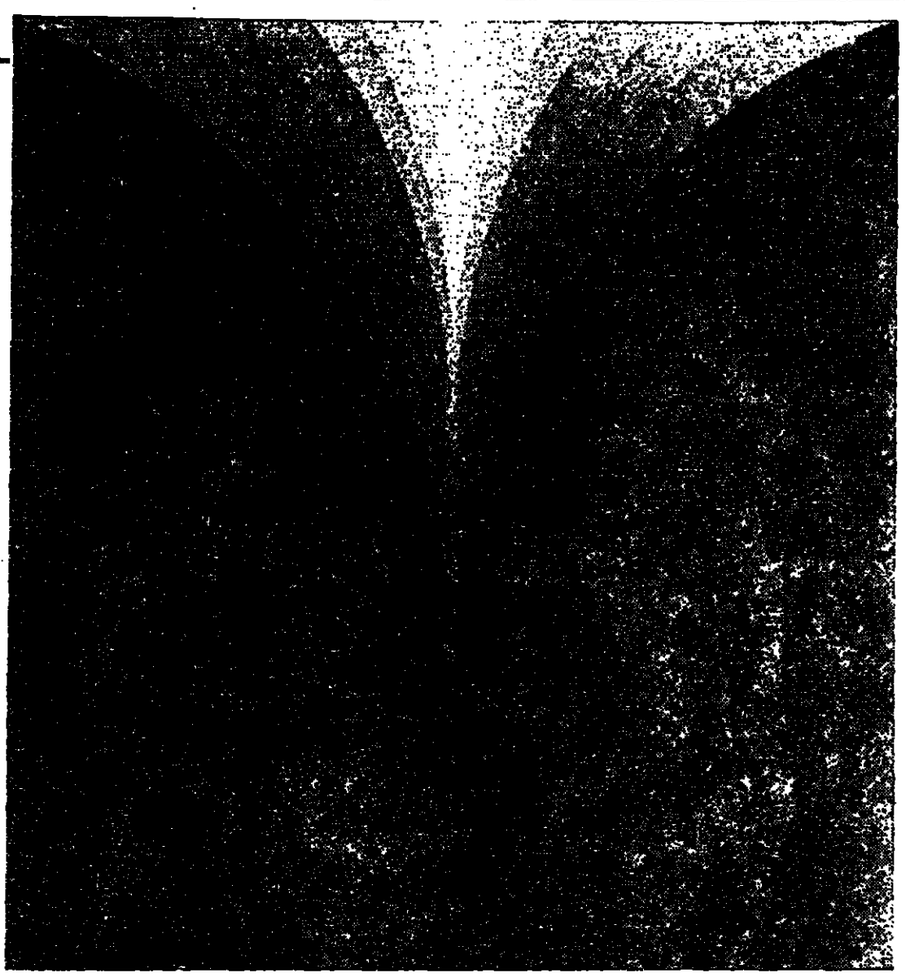

### *'Ennobling'*

One doesn't know where to begin with this sort of thing. I suppose if we reversed that last statement to say "half undressing a woman demeans her, half dressing a man demeans him," some great truth would be shattered. And I'd have said that creative life *always* goes on inside the body. It isn't a stray wind that arouses the male reproductive apparatus Miss Mead places "outside of the body." And I'm not sure that apparatus is any more outside the body than the hand in which a *woman painter holds* her brush. The activating impulse, the force, the power come from within.

And her concluding statement, "With the human body seen as beautiful, not because it is male or female, but because it is human, we may be able to use again as image of humanity not jagged fragments of broken glass *or incongruous bits of metal* welded together, but images as ennobling as those on the ceiling of the Sistine Chapel."

Oh well, it's been a long time since artists' images of human beings were meant to be "ennobling." Vitality is the desideratum now. Nobility is not realized in the delineaments of the human image but in the creative imagination of human beings investing with life forms that may be altogether sexless. Broken glass and welded metal, even debris rescued from junk heaps, have yielded some splendid, even noble works of art.

There is "nobility" in the Cordier & Eckstrom exhibition in a costume from Nigeria, made of appliqué and embroidery, and exhibited under a carved wood headdress. There is nobility in a wooden head from the Congo, its nose a Nixon *slide* under a kingly block of wood serving as a crown. There is nobility in a funny sculpture by cartoonist Saul Steinberg called "The Duke of Mantua," the duke's shoulders fashioned from two "found" wood *shapes that look like* an old hat block cut in half, and his face a collage of newsprint. There is *nobility in a rotting wood Peruvian* grave figure, carved around 1300, and topped with human hair. There is even nobility in the imagination of an art dealer who is never satisfied merely to show his "stock." Invariably Arne Eckstrom gathers together weirdly assorted objects in whose shapes, mood, attitude, material, regardless of when or where they were made, *he spots relationships* stirring in viewers new awareness of the universal quality in art, analogies opening up for them whole new areas for study and joy, and the acquisitive impulse as well. I'm not sure that last is so noble. But it's a rare gallery these days where, as at this one, I'm always wanting to take something away with me.

Andrée Golbin's "Osorno," 68 by 63 inches, in the "Women Choose Women" show.

### *Women's Show*

The women's show, consisting of 109 works chosen by juries selected by the organization called Women in the Arts, is an enormous disappointment. One is delighted with the idea, grateful for the chance the show gives under-exhibited artists a chance to exhibit, appalled to think they were denied that chance up to now because of their sex.

Appalled—but not convinced. The exhibition wasn't totally installed at the time of my visit. Perhaps 15 of the 109 works were still missing. These, however, I saw in photographs and feel that I have a more than adequate picture of the exhibition. And most of what I saw was commonplace, a few works were first-rate, and even more were just awful. There was a graceful, delicate "Kitchen Sink," by Leatrice Rose. Sylvia Sleigh is represented by a small but intense and impressive portrait. Alida Walsh, who does strange surrealist sculptures with fragments of hands and feet, is worth noting. Charmion von Wiegand is seen in a geometrical abstraction of squares that has both style and elegance. Tobi Zausner is represented by a *touching, representational, imagi*native canvas called "Strength of Memory." May Stevens is at hand in one of her highly personal compositions in which dogs' heads are made to suggest military officers.

There are other names, most of them fairly well-known, nearly all with an exhibition history, next to none that are totally *new to me. The complaint would* seem to be, then, that they simply aren't exhibited often enough. I don't suppose any male artists think they're seen enough, either. And that's too bad. I wish artists of every sort, whether black, female, gay or whatever, had more exhibition opportunities, not for their minority status but for their distinction as artists. Most *of all, I wish the work, when we* do have a chance to see it, were better. The show now at the Cultural Center is pretty awful.

## ART MARKET

# *When Prejudice Pays Off*

By Souren Melikian

PARIS, Jan. 12 (IHT).—People who fancy old objects but who don't have much money to spend on them would do well to look into late 19th-century silver, porcelain and glass. While prices have their ups and downs, speculators steer clear of these categories and, thus far, inflation seems to have spared them.

Part of the reason may be the persistent *fascination* with all things even vaguely Louis XV which ...de people with money to spend look down on ...ects from 1850 to 1900. While the fascination ... gone, the prejudice lingers.

This is why bargains are to be had, particularly ... this time of year when the salesrooms at the ...tel Drouot in Paris are almost exclusively popu... by dealers.

Porcelain fans, in particular, would have had a ...d-day Wednesday at an auction conducted by ...ul Pescheteau. For example, there was a *tête-à-*... (breakfast set of two cups and saucers, ...pot and sugar bowl) which sold for 140 francs. ...hrown into the bargain were three other cups ...m a different set but from the same period and ...e in the same style. Technically speaking, all ... pieces (white, high-fired porcelain with a gilt ... were of high quality, typical of the Second ...pire and the early Third Republic. The going ...e in antique shops for the same sort of thing ...50 to 500 francs. The successful bidder was, of ...rse, a dealer.

### *Bargain Elegance*

...ext came a milk pitcher made during Louis-...lippe's reign and harking back, in design, to a ...el fashionable under Napoleon I. It was elegant ... its tall stem and curved handle. It was also ...al bargain at 98 francs, 60 centimes.

...rather fine, ormolu-mounted porcelain stand ... clock and candlesticks, typical of Second ...pire copies of Louis XV rococo, went for 250 ...es, about four times under what an antique ...ler would ask. The two candlestick holders look... like twisted tree trunks, leaves, knots and all. ...porcelain was biscuit with a milky, mat look. ...outless an inexperienced buyer would never ...e wangled this lot for a mere 250 francs. Deal... don't bid too hard against each other, but when ...iders try to play their game, the professionals ...me remarkably hardnosed. Be that as it may, ...price and others in the sale shows that the ...eral level of 19th-century porcelain is still quite ...o is that of 19th-century French silver. Old silver—French or English—is a blue chip investment. Prices for 17th through early 19th-century silver have recovered from the 1969-1970 slump. And in the face of dwindling supplies of Georgian silver, Victorian silver has been doing very well in London. But, here in Paris, late 19th-century French silver is still cheap.

At Wednesday's sale, there were several lots, ranging from the first half of the Second Empire (1852-1860) to the late 1880s, typical of the average work of the period. A good cruet stand *(porte huilier)* in a demi Louis XIV, demi Louis XVI style (favored circa 1865-1870), weighing 700 grams, made only 428 francs.

### *Other Hats*

Although the stand was no masterpiece, it compared favorably with the Victorian rubbish that has been going for far higher prices in London. Of course, cruet stands are hardly exciting when the cruets themselves are missing. But other lots showed that other types of objects, looked on with more favor, can be equally cheap.

A matching coffee pot and sugar bowl, weighing 1,530 grams, made circa 1880, went for 1,174 francs. A comparable set, weighing 1,200 grams, sold for 835 francs. In both cases, the shapes were heavy, which was typical of the period, but both lots were aesthetically interesting as their makers had not tried to copy Louis XV or Louis XVI models.

More expensive, comparatively, was Sheffield plate (in French, *metal anglais*). But prices were still low compared to those being fetched in London. For example, a rectangular tray with ribbed rim, sold for 371 francs. A pair of *warming stands* very beautifully shaped were auctioned for a mere 324 francs. Made between 1880 and 1890, they were in mint condition.

The Drouot sale further reinforces the contention that inflation has thus far spared the lower reaches of the art market. It also shows that what happens in London will not necessarily happen simultaneously in Paris. Sotheby's Belgravia, the branch of the London auction firm founded in the fall of 1971 to sell 19th and 20th-century objects, is *getting better prices for the same sorts of things.*

However, there is so much of this sort of stuff around that eventually even the collector may tire if it. Prices have been fluctuating from sale to sale, from dealer to dealer. This makes late 19th-century objects an ideal field for the disinterested buyer who simply wants some old things around his home. It also makes the category exceedingly sticky for the investor.

## *$1,700 for Soviet Bank Note Signed By World Leaders*

NEW YORK, Jan. 12 (AP).—A Soviet bank note, signed by several world leaders during World War II, was sold by the Charles Hamilton Galleries to an anonymous buyer yesterday for $1,700.

The *one-chervonyetz note* was signed by Franklin D. Roosevelt, Harry S Truman and Dwight D. Eisenhower, Winston Churchill, Nikita Khrushchev, U.S. Air Force Gen. Carl Spaatz and William Lawrence, at that time a New York Times correspondent, according to a spokesman for the gallery.

The signatures were gathered *by the late Merriman Smith, who* was United Press International newsman at the Yalta and Potsdam conferences.

A handwritten letter written to Smith on White House stationery by Truman was also sold to a representative of the B. Altman department store for $2,400. In the letter, dated Sept. 3, 1946, Truman said that he hoped his *epitaph would mention "my integ*rity and sincerity."

## Shrine in N.Y. Robbed Of $350,000 Crowns

NEW YORK, Jan. 12 (AP).—Thieves, who apparently were hiding in the church, stole two diamond-encrusted gold crowns and other jewels valued at $350,000 from an altar mural in a Roman Catholic shrine in Brooklyn.

The same crowns were stolen in 1952 but were returned eight days later. Police said then that reputed *Mafia leader Carlo Gam*bino, who attends the Church of St. Rosalia, let it be known that he wanted them back.

## Missing Mummies

BERLIN, Jan. 12 (UPI).—East German Egyptologists, in a discovery described as "sensational," said today that what were considered the three smallest mummies in the Permagon Museum *contain no skeletons.* The East German news agency ADN said that the discovery was made when experts studied X-rays.

## LONDON

# *Funny Lines in Search of a Play*

By John Walker

LONDON, Jan. 12 (IHT).—There is a growing Identikit similarity about most of the humor to be found in fringe theater, the same endless reshuffling of a few well-thumbed stereotypes, that derive from the strain of surreal wit and, indeed, the often strained wit of Joe Orton, Spike Milligan, and N. F. Simpson.

The earlier exuberant eccentricities have now been tamed into a succession of camp mannerisms. We are offered a world inhabited mainly by comic aristocrats, stupid policemen, and numerous transvestites. What the new humor lacks is a logical frame, the steady rational advance from incorrect premises into total lunacy.

The Almost Free Theatre's lunchtime season of exotica has given us an anthology of these comic clichés, culminating in Jim Hiley's "Lord Mountlady and the Mortal Odours or the Dalai Lama Lies Dead in the Road." Mr. Hiley has a lively manic wit but he has written a collection of funny lines in search of a play.

He operates on some principle of intermittency of free association, so that good ideas and situations are never developed, but immediately dropped in favor of some other joke that has just occurred to him. He peoples the play with a mad lord who talks to God, his son, who is a Buddhist statue, his wife, who lives in a portable sauna, a funny policeman ("Queerbasher of the Yard") and a maid who proclaims herself to "exist only in the world of boulevard comedy." She, of course, is played by a man.

Mr. Hiley offers some funny moments—journalist to cop: "Anything you say may be written down and used to make money"—but not much else, apart from indicating that his heart is in the right place and that he's on the side of life and against the death-dealers and other such vague and warming affirmations. I hate to use the word, but if he could discipline his wit, the results might be much funnier.

What is strange is that, in this play and others around the fringe, you catch a whiff of misogynism. It is not just that women turn out, more often than not, to be men in drag. But there is a feeling here of revulsion from women, that they are passive and inferior beings. And that's no laughing matter.

Still, it is encouraging to see that the fringe flourishes and expands. Roy Guest, who runs a folk-singing club, the Howff, on Regents Park Road, behind the Roundhouse at Chalk Farm, is to present hour-long shows there at 9 p.m. from Tuesday to Saturday. Mr. Guest, adapting a remark of Brecht, says: "I want a theater where I can drink." Audiences at the Howff will be able to eat as well, while watching the performance. The first show, which opens Jan. 16, will feature Incubus in "Strut and Fret," a selection of medieval plays and diversions.

* * *

Other recent openings: "Bullshot Crummond," by Low Moan Spectacular at Greenwich Theatre. Excellent fun, a parody of chauvinistic British thrillers and 1930 films, which ends its run this Saturday.

"Behind the Fridge," by Peter Cook and Dudley Moore, at the Cambridge Theatre. Not the right theater for a two-man show, but at least half the sketches by this witty, intelligent duo survive the setting.

"Bunny," by Norman Krasna, at the Criterion. Eartha Kitt, overreacting as a golden-hearted whore, vainly tries to breathe life into a very dead comedy.

"My Fat Friend," by Charles Lawrence, at the Globe. A funny play on the perils of slimming, full of the limp joys of Kenneth Williams, well supported by Jennie Linden in the title role.

Samuel Beckett's "Not I," starring Billie Whitelaw, receives its European premiere at the Royal Court on Tuesday, in a double bill with a revival of "Krapp's Last Tape," starring Albert Finney.

John Osborne's "A Sense of Detachment" will be brought back to the Royal Court from Wednesday as a late-night show, playing at 9:30 p.m.

Bill Bryden's "Willie Rough," about life and work in the Clydeside shipyards during World War I, opens at the Shaw Theatre on Wednesday, marking the first visit to London of the Royal Lyceum Theatre Company of Edinburgh.

## UN Mural Unveiled

UNITED NATIONS, N.Y., Jan. 12 (Reuters).—United Nations Secretary-General Kurt Waldheim Wednesday unveiled here the first work of art commissioned under a General Assembly resolution—a mural commemorating the 1970 UN World Youth Assembly. The 8-by-18-foot work, called "Titans," was done by the American artist Lumen Martin Winter, 64.

## *Harrods Plans To Open Stores in New York, Paris*

NEW YORK, Jan. 12 (NYT).—Harrods, Ltd., the largest store in Britain, is planning to open a store in Manhattan which would be its first in the United States.

The House of Fraser, Ltd., Harrods' parent concern, is negotiating with one or more New York specialty stores in a move to acquire one and convert it to Harrods New York.

In disclosing the plan, Sir Hugh Fraser, chairman of the House of Fraser, declined to name the New York stores with which the company is negotiating.

The 35-year-old, fourth-generation representative of the Fraser mercantile family in Britain also said that Harrods was negotiating with a prominent Parisian *department store and hoped soon* to open its first French store as Harrods Paris.

Sir Hugh was in New York this week to receive the international gold medal given at the annual convention of the National Retail Merchants Association.

AUTHORS WANTED BY N.Y. PUBLISHER

Leading book publisher seeks manuscripts of all types: fiction non-fiction poetry, scholarly and religious works, etc. New authors welcomed. Send for free booklet H-3. VANTAGE Press, 516 W. 34 St., New York, N.Y. 10001, U.S.A.

The Connoisseur in

POLAND

CRACOW ART FESTIVAL
30 SEPTEMBER TO 7 OCTOBER, 1973.

The combined expertise of the international art magazine, The Connoisseur, and the Polish Ministry for Culture has resulted in the arrangement of an important one-week Festival of the Arts in Cracow for 1973. This event, the first of its kind, has been inspired by the many rare and beautiful treasures possessed by one of Europe's best preserved mediaeval cities.

All those interested in Art will find it rewarding to take part in a week of special events which have been carefully planned so as to provide an introduction to the superlative art collections and the imposing historical background of the oldest cultural centre in Poland.

The cost of £120 (U.S. $300) per person covers accommodation at a first class hotel in Cracow for seven nights, in either double or single rooms with private bath, all meals, entrance fees, evening performances and local transport.

Fully inclusive arrangements available through American Express from either London, Paris, Brussels or Geneva.

*Special offer. January, 1973. Cracow issue of "The Connoisseur" available at half price, for £0.50 per copy, including postage within Europe.*

TO: THE CONNOISSEUR, CHESTERGATE HOUSE, VAUXHALL BRIDGE RD., LONDON SW1V 1HF. (Tel.: 01-834 2351, Ext. 227.)

Please forward urgently full details of your Cracow Art Festival for 1973:

## Raise Needed In Bank Rate, Japanese Say

### Inflation Curb Seen Necessary by Officials

TOKYO, Jan. 12 (Reuters).—Officials of the Economic Planning Agency said today Japan should raise its bank rate from the present 4 1/4 percent to prevent further inflationary tendencies in the economy.

The statement was related to the increase in West Germany's bank rate by one half point to 7 percent yesterday, which the officials believed was primarily intended to curb domestic inflation.

They said the increase in Japan's reserve ratios announced earlier this week would be insufficient to cope with inflationary tendencies here in view of the record draft national budget announced by the government, and the high dollar inflow since 1971.

Their view is shared by many monetary authorities, who, however, fear a higher bank rate at this stage might attract further dollars to Japan.

The officials said their position was reflected in the monthly economic report the Economic Planning Agency presented to the cabinet council of economic ministers today.

The report said wholesale prices in Japan, which rose by 0.9 percent over the preceding month in September, 1 percent in October, and 2.3 percent in November, is likely to continue to increase steadily.

It also reported that Japan's external reserves increased $3.13 billion during 1972 to total $18.36 billion at the end of the year. The officials also said many economists are proposing to revalue the yen again in an effort to stem the inflow of dollars that is liable to create further liquidity in Japan.

## *Rapid Price Increases Expected by Europeans*

BRUSSELS, Jan. 12 (AP).—An official survey of 25,000 households in the six countries of the old Common Market during the late autumn showed an expectation that prices will go on rising at a comparatively rapid pace.

In Italy, the Netherlands and Belgium, consumers took an even more unfavorable view of the price outlook than in the first half of the year. But in France and West Germany, the number of people who thought their financial situation better than, or much the same as, a year earlier was higher than in a previous survey.

Retail prices continued their rapid upward movement throughout the six countries in October, with food prices showing a particularly pronounced rise. For industrial goods, the year-to-year increase in November was 3.1 percent in Belgium and 5.8 percent in West Germany.

A monthly report by the Executive Commission said one major reason was the effort by businessmen to pass price increases on to the consumer, plus special circumstances like the prospect of the value-added tax in Italy and a rise in telephone rates. West Germany put up its tobacco tax.

There was a slight increase in employment, with a decline in the number of idle workers especially notable in France and to a lesser extent in Italy and West Germany. The report, which covers the month of October and part of November, was dated Dec. 29.

## Global U.S. Quotas Opposed

WASHINGTON, Jan. 12 (Reuters).—Textile industrialist Frederick B. Dent, who is President Nixon's new choice for commerce secretary, came out strongly today against mandatory across-the-board quotas on all foreign goods and taxation of U.S. industries overseas on a current basis.

Mr. Dent told the Senate Commerce Committee at his confirmation hearing that he favors an examination of each U.S. industry individually to see whether it needs help against foreign competition, and if so, whether it should be in the form of quotas, tariffs or other relief.

He attacked the major features of a highly protectionist trade bill during a direct confrontation with its author, Democrat Vance Hartke of Indiana.

Mr. Dent said Sen. Hartke's plan to roll back entry of foreign goods to pre-1969 levels if they have an adverse impact on U.S. industries was not desirable.

"Rollbacks are a particularly dirty word in international negotiations," he said.

Mr. Dent, however, indicated he would be a tough bargainer in any international negotiations, saying the United States should negotiate from a selfish interest position.

He also opposed another big feature of the Hartke bill, which would tax U.S. industries operating overseas on a current basis, rather than at some future time when the money is brought home. He said the tax system, whether at home or abroad, has got to be equitable to insure that companies can compete.

## Fed Raises Discount Rate To 5 Percent

### Says Move Shouldn't Cause General Rise

WASHINGTON, Jan. 12 (AP-DJ).—The board of governors of the Federal Reserve System today approved an increase in the discount rate to 5 percent from 4.5 percent by all 12 Federal Reserve banks, effective Monday.

The board said "this move is designed to bring the discount rate into better alignment with short-term market interest rates which have risen substantially over recent months."

The discount rate, which is the rate member banks charge on borrowings from the Federal Reserve System, had been at 4.5 percent since December 1971.

The board noted that the increase lifted the rate to the 5 percent level that "prevailed as of Aug. 15, 1971," when the Nixon administration froze wages and prices.

The reserve board emphasized that "the present increase of the discount rate is merely a passive adjustment to what has already happened to market interest rates and it therefore should not be the occasion for a further increase in interest rates."

The board focused on the present disparity between the low discount rate of 4.5 percent and other interest rates.

It said "the widened gap between the discount rate and other sources of bank funds has contributed to a sharply increased level of borrowing by banks from the Federal Reserve System in recent weeks."

#### Money Supply Record

NEW YORK, Jan. 12 (NYT).—"Historically high" rates of monetary expansion have been evident in recent weeks, the Federal Reserve System reported yesterday.

This rapid monetary growth, which some economists believe could be potentially inflationary, has occurred at a time when, according to the Federal Reserve Bank of New York, "the vigorous expansion of economic activity appears to have gained further momentum."

Total borrowing by banks from the Fed declined during the week ended Wednesday to $691 million for the 20-year high of almost $1.8 billion the previous week. But over the four weeks ended Wednesday, borrowing averaged almost $1.2 billion a day roughly double the $596-million average in the four weeks ended Dec. 13.

#### Money Supply Drops

The nation's money supply—the total of most checking accounts at the banks plus currency in the hands of the public—also dropped sharply in the most recent week for which data were reported, in this case the week of Jan. 3.

But if looked at over a somewhat longer time span, the rate of growth in the money supply has accelerated sharply. In December, for instance, money expanded at a 15.5 percent seasonally-adjusted annual rate, while over the fourth quarter the annual rate of growth was 8.6 percent.

*This, Fed officials noted yesterday,* was a historically high rate in relation to the roughly 6 percent rate of expansion in money that has been characteristic in recent years. Many economists outside of the Fed have assumed in recent months that the money managers' target for growth in money supply was about 6 percent —and that this target would be lowered somewhat during 1973.

## *Nixon's Phase 3—How It Works*

By Philip Shabecoff

WASHINGTON, Jan. 12 (NYT).—Following are some questions compiled by The New York Times about the new economic policies announced by President Nixon yesterday and some tentative unofficial answers, some of them from staff members of the Cost of Living Council.

**Question**—Have wages and prices now been *de-controlled* by the President?

Answer—No. The system of wage and price controls has been modified and will now be largely self-administered by business and labor through "voluntary compliance." But business and labor will still be required to adhere to wage and price standards set by the government.

Q—What happens if a company or a union now decides to ignore the price or pay standards?

A—The government will monitor wage and price developments and will take action when it determines that voluntary behavior is out of step with the goals of the anti-inflation program.

Q—What happens now to the Pay Board, the Price Commission and the Cost of Living Council?

A—The Pay Board and the Price Commission will be terminated. The Cost of Living Council, a group of high government officials, will now control the entire economic stabilization program. The council will add pay and price divisions.

Q—Are any areas of the economy still under mandatory controls?

A—Yes, wages and prices in the food industry, health services and construction will still be subject to government-imposed controls. These are areas where price increases have been sharpest.

#### Price Rises Possible

Q—Can a big company, say a major company, now go ahead and raise prices without asking anybody?

A—Yes, but a company with a price application now pending before the Price Commission, say a General Motors, will still have to obtain specific approval from the Cost of Living Council. Moreover, the government has reserved the right to roll back price increases if it determines that price standards are being violated.

Q—May employees now demand and companies grant wage increases without obtaining permission or submitting new contracts for review?

A—Yes, but they are expected to use the existing Pay Board standards, including the 5.5 percent general limit on wage increases, as a guideline. On wages, too, the government has reserved the right to intervene either before or after the increase is put into effect.

Q—*Did the President make* any changes in the price guidelines?

A—Yes. The restrictions on profit margins have been eased. A company may use any two of the past four fiscal years as its base period in determining what is an acceptable profit margin. Previously a company could choose only the best two of three previous years in determining its base period.

Q—Do the new standards permit companies to expand their profit margin—profits as a percentage of sales—beyond base period levels under any circumstances?

A—Yes, if a company's average price increases do not exceed 1.5 percent it may widen its profit margin. Generally, price increases should still reflect only increased costs.

Q—Have the wage standards been changed?

A—Not yet. But the President named a 10-man labor-management advisory committee to advise the Cost of Living Council whether pay guidelines should be changed and, if so, how.

Q—What action can the government take against companies, unions or individuals that fail to adhere voluntarily to wage or price standards?

A—The Cost of Living Council has been given the authority to block proposed wage and price increases, to set binding pay or price levels, and to roll back price and wage increases already in effect. Moreover, the economic stabilization law provides for a fine of up to $5,000 for each violation of pay and price regulations.

Q—*How will the Cost of Living* Council keep tabs on companies and unions to be sure they are voluntarily complying with the program?

A—Through reviews of reports from companies or employee unions, spot checks and audits of company records and by using government and trade data.

## Stocks Plunge On Doubts Over Phase 3

### Dow Drops 12 Points In Big Trade Volume

By Vartanig G. Vartan

NEW YORK, Jan. 12 (NYT).—The stock market, which rallied vigorously yesterday in response to the unveiling of Phase 3 economic controls, took a second look today at the program and then dropped sharply.

The abrupt turnabout in New York Stock Exchange prices left many Wall Streeters puzzled—even as analysts mustered explanations for the market's latest behavior.

It added up to one word: Uncertainty.

The Dow Jones industrial average sank 12.34 to finish at 1,039.36, its poorest level of the session, after showing small gains in the opening hour.

Yesterday, the Dow rose 5.64 to 1,051.70, thereby setting a record closing high. Between noon and 1 p.m., reacting to President Nixon's relaxation of wage-price controls and profit-margin limitations, the blue-chip average soared nearly 14 before it descended during the afternoon.

Today declines outpaced advances by 1,083 to 416. The list of 1972-73 lows totaled 57 stocks, compared with 50 highs.

The steep rise in stock prices shortly after noon yesterday underscored Wall Street's habit of overreacting at times to an unexpected development. Traders read the headline on the story that came from the Dow Jones news tickers— "Phase 3 controls to be largely voluntary" —and their immediate response was to regard this as bullish.

Then, on second thoughts, Wall Streeters began to wonder. They started to assess the potentials in Phase 3 for a renewal of the inflation rate if prices climbed and if labor won large increases in major contracts to be negotiated later this year.

"On delving into the actual text of Mr. Nixon's message," one research partner noted, "there was enough bad news to result in a possible profit squeeze down the road."

"The market had overreached itself in the Thursday rally," he added. "It had gotten ahead of the good news and Mr. Nixon's message was enough of a mixed bag to give pause to traders and investors. In this atmosphere of doubt, selling stocks today was logical."

Volatile Walt Disney surrendered 9 to 214, Superior Oil 5 1/2 to 339, and Corning Glass 3 1/2 to 286.

Stocks declined in heavy trading on the American Stock Exchange. The Amex index fell 0.17 to 28.51, while declines outnumbered advances, 689 against 278. Turnover was 5.51 million shares, compared with 3.31 million yesterday.

### To Supervise U.S., Foreign Stocks

## *SEC Creates Unit for International Issues*

WASHINGTON, Jan. 12 (NYT).—The creation of a new office of International Corporate Finance with responsibility for supervising security offerings by U.S. companies to foreign investors, as well as offerings by foreign issuers here, was announced yesterday by the Securities and Exchange Commission.

SEC chairman William J. Casey said the step was taken in recognition of the growing internationalization of capital markets and the securities business and "the need to plan now rather than react later" to this development.

"U.S. companies are showing increasing interest in arranging for partial distribution of their new issues abroad and the new office will deal with accounting and disclosure problems arising from the need to meet the requirements of more than one jurisdiction," Mr. Casey said.

#### Office Head Named

Carl T. Bodolus was named to head the new office that will be part of the Division of Corporate Finance. A member of the SEC staff since 1957, Mr. Bodolus was appointed branch chief of the division in 1962 and has served in that capacity since then.

Among other matters, the new office will also have supervisory responsibility for the following areas:

- Financial reporting by foreign issuers under the Securities and Exchange Act;
- Promulgation of special Securities Act registration forms and rules for U.S. issuers including mutual funds which offer their securities in foreign markets;
- Offerings of American depository receipts to U.S. investors;
- Development of guidelines as to when securities issued by foreign companies and not registered with the SEC may be traded by U.S. dealers without violating the Securities Act;
- Development of guidelines for registration dates of offerings made by U.S. companies for foreign investors;

### Japan Prices Higher

TOKYO, Jan. 12 (Reuters).—The Bank of Japan said today the wholesale price index rose by 2.1 percent in December to 119.1 (base year 1965). It was the seventh consecutive monthly rise in wholesale prices.

## *Japan Orders Six TriStars Plus Options*

TOKYO, Jan. 13 (AP).—All Nippon Airways announced today that it has signed a contract to purchase six Lockheed TriStar airbuses at a cost of $133 million and has taken out options on an additional 15.

All Nippon announced its intention to purchase the six TriStars last October. At the same time Japan Air Lines said it would buy four short-range versions of the Boeing 747 jumbo jet for use on domestic routes.

The Japanese domestic airline said its contract with *Lockheed calls for the first* TriStar to be delivered by December and the remaining five at the rate of one a month beginning in January 1974.

## One Dollar—

*LONDON (AP-DJ).—The following* are the late or closing interbank rates for the dollar on the major international exchanges:

## Financial News and Notes

### *Alcoa Develops Production Process*

Aluminum Co. of America has developed a new electrolytic method of producing primary aluminum that will sharply reduce electric and labor costs while at the same time eliminate undesirable environmental emissions. John D. Harper, chairman, says that the new process is "the most attractive alternative to the current Hall electrolytic process it has been able to find in 15 years of concentrated research." He adds that research cost about $25 million. Mr. Harper says the new process is expected to reduce by as much as 30 percent the electricity required by the most efficient units of the Hall process now used worldwide.

### *IBM France Faces Joint Charge*

Itel Corp.'s French subsidiary will make a joint complaint to the Paris commerce tribunal with Sté. Gachot over the refusal of an International Business Machines Corp.'s world trade unit to service Gachot's IBM 360/30 computer. Gachot's computer has Itel peripheral equipment attached to it and IBM says it is an established policy not to maintain equipment which has been altered by attachment of other manufacturers' devices, on the grounds this makes servicing impractical for technical reasons. Itel France last week sought an emergency order from the tribunal asking that IBM France be ordered to service the computer, but the referee of the hearing dismissed the case pending a technical inquiry, citing the court's lack of competence to deal with the case.

### *U.S. Store Chain in Japan Pact*

International Dairy Queen, of the United States, and Marubeni Corp., a Japanese trading firm with annual sales of $8.5 billion, have signed an agreement for the development of Dairy Queen in Japan. Initial plans call for Dairy Queen Japan Ltd. to complete 500 stores within five years, which if met could result in gross sales for the joint venture of $60 million a year. Dairy Queen had sales from its franchised operations for the fiscal year ended Nov. 30 of $41.5 million and net income of $1.8 million, or 31 cents a share. Total sales of all franchisees for the year are estimated at $470 million.

### *U.S. Textile Imports Rise*

U.S. imports of textile and apparel products totaled $2.64 billion in the first 11 months of 1972, the Commerce Department says. Imports last November totaled 562 million square yards, with Japan, Hong Kong, Taiwan and South Korea the leading suppliers. Imports were down 1 percent from last October, but were 73 percent higher than in November, 1971, when a U.S. dock strike delayed deliveries. Imports of synthetic and wool textiles from major Asian suppliers generally declined last year, but imports of cotton *textiles from these same countries rose 21 percent* in the first 11 months of 1972 from the like period a year earlier, the agency says.

### *German Industrial Orders Increase*

Demand for West German industrial goods continues to increase, with the order inflow up 4 percent in November from October and September, the Bundesbank reports. Export factory orders were 12 percent higher in November than the two previous months as a result of accelerated worldwide economic expansion. However, the inflow of domestic orders was only 1 percent higher. Industrial production in November surpassed that of the two preceding months by 3 percent each, the Bundesbank said.

### French GDP Rises

PARIS, Jan. 13 (Reuters).—France's gross domestic product index rose to 105.6 in the third quarter of 1972 from 103.6 in the second quarter, the National Statistics Institute said today.

**Soaring Sales for New Growth Discoveries**

**One Has Revenues 20 Times Above Year-Earlier Figures**

The biggest mistake the investing public has made in years has involved the recent evacuation of growth and glamour areas in favor of traditional investments. This is the attitude of the research team responsible for "NEW ISSUES AND INDUSTRIES"—a weekly guide to new growth stocks and groupings where performance may frequently overshadow anything you've ever encountered as a growth investor.

For example our newest report talks about a maker of a new kind of office-automation equipment whose sales for the latest quarter were more than 20 times as high as they were a year earlier. In another case which is examined a minicalculator maker with sales of $4.4 million in 1971 and $13 million last year is recommended for a dynamic market advance from $16 as sales explode again this year to a possible $50 million.

Even long-depressed LITTON may be ready for a come-back on the basis of hot new electronic systems—one of which is covered in this new growth study. To receive a copy as part of a free introductory series, simply telephone, telex or return the coupon.

**INFLATION AND INCOME 15%**

**ASL (INTERNATIONAL LUX.) S.A. - Luxembourg**

Manufacturing chemists Antibiotics/antiallergic cosmetics

January, 1973.

"Dear Investor,
The remarkable progress which the Companies ASL have made in recent years has continued and indeed, continued at an accelerated rate! We achieved record profits in every division of the group last year. Many new manufacturing firms in many countries are asking for our financial and technical assistance. We have a large program of expansion and we are keeping bureaucracy to a very low level through continuous hard work and extensive travel.
We need more capital amounting to some millions of dollars. We invite you to invest some of your savings with us. Your investment can be a minimum of five hundred dollars and a maximum of several hundred thousands. It does not have to be in dollars as local currencies are accepted.
We specialize in mergers with pharmaceutical and agricultural feed stuff companies all over the world. Through this system, we help the local national company, the native people and we all make money. Our production is ethicals and antibiotics for human and veterinary use. Our top speciality is antibiotic feed grade for the production of meat in 50 days. We need more capital and we invite you to contact us if you are interested in purchasing bonds. Our bonds have the following advantages:
1. A guaranteed 15% income for the first year and 16% for the second year. After two years you can convert them to shares.
2. The income is paid monthly in any desired currency and can be sent anywhere in the world.
3. The ASL-BOND may be cashed in at any time and you will receive back the full amount of your original investment.
4. The income you receive from your ASL-BOND will be tax free. Local governments are granting the taxes for our Company investments, as these are hard currency.
5. The cost of living index rose 6,8 minimum during the last twelve months all over the world (The Financial Times Survey, December, 1972.)
6. Taking this Survey into consideration our ASL-BONDS are not offering mistrusting high income, as you have to consider 7% less inflation rate. The worldwide factories in our group are increasing prices according to the local cost of living index. It is legally permitted.
7. So it is not as high as it looks! You receive a high income and we make money too. The truth, the whole truth and nothing but the truth.

Factories in many countries! We are negotiating mergers of more factories and the purchase of mercantile ships for the transport of chemicals.
Please be kind enough to write us! Thanking you in advance, we remain,
Sincerely,

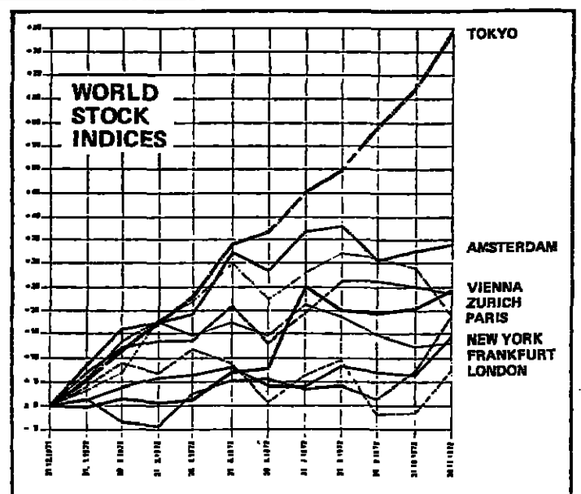

Dr. Paul ROHRER,
President of ASL (INTERNATIONAL) S.A."

# SEPRO

SECURITY & PROSPERITY FUND S.A.

2 Boulevard Royal, Luxembourg

## GENERAL MEETING OF SHAREHOLDERS

Notice is hereby given that the third annual general meeting of the Company will be held in the conference room of Banque Internationale à Luxembourg S.A., 2 Boulevard Royal, Luxembourg, on Wednesday, 31st January, 1973, at 3:00 p.m., for the following purposes, namely:

I

To receive the reports of the Board of Directors and of the Statutory Auditor and to approve the statement of accounts for the period ended 30th September, 1972.

II

Appropriation to legal reserve and carry forward of profits.

III

To discharge the Directors and the Statutory Auditor in respect of their duties and functions for the period ended 30th September, 1972.

IV.

Any other business of an annual general meeting.

The meeting will be valid whatever number of shareholders are present or represented but no person, either for himself or as proxy for others, may vote in respect of more than 20 percent of the issued share capital of the company or more than 40 percent of the total number of shares held by shareholders present in person or by proxy at the meeting. The resolutions to be proposed at the annual general meeting require the approval of a majority of the total number of shares held by all shareholders present in person or by proxy at the meeting. Shareholders may vote at the meeting or at any adjournment thereof in person or by proxy.

Holders of bearer shares must deposit their certificates with one of the following banks not later than 12 noon on 26th January, 1973:

Baring Brothers & Co. Ltd., 8 Bishopsgate, London, E.C.2.
Credit Suisse, Paradeplatz 8, 8001 Zurich.
Swiss Bank Corporation, Paradeplatz 6, 8001 Zurich.
Société Générale, 29 Boulevard Haussmann, Paris (9e).
Banco di Roma per la Svizzera, Piazzetta San Carlo, Lugano.
Banque Internationale à Luxembourg S.A., 2 Boulevard Royal, Luxembourg.

The banks will, upon such deposit, issue a ticket of admission and, if required, authenticate the form of proxy. Holders of bearer shares and their proxyholders will be admitted to the meeting upon presentation of such admission ticket and proxy.

The same banks will also authenticate proxies of registered shareholders. Registered shareholders voting in person will be admitted upon presentation of their certificates.

By order of the Board of Directors

Banque Internationale à Luxembourg S.A.
Director

Luxembourg, 12th January, 1973.

# STOCK ADVICE For Next 4 Weeks Only $2 ($8 Value)

If you will attach $2 to the coupon below and return it to us, we'll send you our stock market advisory Service and advice every week for the next 4 weeks.

This is an $8 value based on our regular price but all you send is $2—**which is slightly more than the usual cost of a single issue.**

Included is our Weekly Market Commentary, Stock Service Digest—a Digest of 25 Advisory Services, Business Outlook, Industry Surveys, Trader's Page, Overseas Report, Group Studies and other investment aids. Stock Recommendations include: (1) Stocks Recommended By 25 Other Well-known Investment Advisers; (2) Model Stock Portfolios; (3) Growth Stocks with Specific Buy-Sell-Hold Advice; (4) "Master List" of Recommended Stocks—Both Speculative and Conservative; (5) Over-the-Counter Recommendations; (6) "Trading" Suggestions.

**4 Stocks Under $25**

With your $2 Trial Subscription, you also receive our recommendations on 4 Stocks Under $25 for long-term accumulation. And our buy-sell-hold advice is offered on 22 Volatile Issues such as Syntex, Avon, Disney, Burroughs, IBM and Xerox.

**30 Stock Split Candidates**

You also receive as part of our offer our list containing 30 Stock Split Candidates.

**Money-Back Guarantee**

Fill out the coupon below and send it today with $2 for your 4 Week Trial of Dow Theory Forecasts. You must be satisfied or your money back. (New subscribers only. Subscription cannot be assigned without your consent.)

MAIL TODAY

**DOW THEORY FORECASTS, INC., Dept. NYTI 1-13.**
P.O. Box 4550, Grand Central Station, New York, New York 10017.
☐ Send Airmail. $2.00 additional.

z—Sales in full.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. h—Declared or paid after stock dividend or split up. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. p—Paid this year, dividend omitted deferred or no action taken at last dividend meeting. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

cld—Called. x—Ex dividend. y—Ex dividend and sales in full. x-dis—Ex distribution. xr—Ex rights. xw—Without warrants. ww—With warrants. wd—When distributed. wi—When issued. nd—Next day delivery.

vj—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies. fn—Foreign issue subject to interest equalization tax.

Year's high and low range does not include changes in latest days' trading.

Where a split or stock dividend amounting to 25 percent or more has been paid the years' high-low range and dividend are shown for the new stock only.

## *REGENESIS*

*By Robert Granat. Simon & Schuster. 313 pp. $7.95.*

Reviewed by Anatole Broyard

"I feel I'm starving to death, have been starving all my life. I need a certain kind of food soon or I'll die." In Robert Granat's "Regenesis," this is how his hero, Edward, experiences his second breakdown within a year. His whole being becomes "a maniacal search party" for this "food." On sick leave from his job as a high school teacher in Albuquerque, he sends his understanding wife and his two children to her parents in Ohio, so that he can devote all his time and energy to trying to find whatever it is that will save or restore him. He has already tried shock treatment, drugs, psychotherapy. He is 33, intelligent, in love with his family; his life history is of only average unhappiness. Surely, he pleads, there must be hope for him. . . .

He feels that his predicament is "spiritual." Once he annoys his analyst by quoting Jung to the effect that most of the psychological problems in patients over 30 were actually spiritual problems. "Don't you need something to believe in?" he asks his doctor, and the answer is, "I believe in growth." When Edward asks what kind of growth? his psychiatrist evades the question by saying that, to be able to help *all* his patients, he must keep himself value-free.

But that is why I am mad, Edward answers. Freedom from values has reduced me to a chaos of possibilities, and like the philosopher's logical jackass who starves to death between equidistant bales of hay, I, too, am starving. There is no logical reason to choose anything—everything being equidistant—but to live is to choose. When the doctor suggests that it sounds as if Edward is holding out for a miracle, Edward denies it. He doesn't expect God to come to him. He doesn't even want God. All he wants is "a sense of Him, a scent of Him, His whereabouts." Though he has "neither expectation nor desire to go to the North Pole or the North Star," he needs to know in which direction North is, simply in order to navigate correctly down here where he is.

He has "lost" his mind, he points out, and cannot even begin to look for it unless he can first get his bearings. He has fallen out of the pattern of his life: the "data-processing mechanism" that regulates his separate, fragmented self—personal, professional, social, secret—has broken down and they are colliding like blind people in a panic. On the brink of suicide, he pauses to mock it: "Not even the suicide kills himself in desperation. Before the step he deliberates so long and so carefully that he literally chokes with thought." Indigestible thought.

Walking aimlessly, passing a church, he gives in to an impulse and enters. But the crucifix is a 30-foot-plus sign of stainless steel tubing, with no figure on it. The stained glass window is an abstraction, depicting only "a religious mood." The minister is "tall, slim, 30, soberly suited and tied. . . . He might have been a junior sales executive." The church itself is new, "redolent with the spirits of recently departed architect firms and design associates, color schemers, subcontractors, fund-raisers, bank officers, contract lawyers and building inspectors."

When Edward wakes one morning, the day is "imposed on him a criminal sentence"; he wakes with his inflamed consciousness full of someone "watching a wild animal from a blind." He is living in the end of his nerve when temporary salvation arrives in the form of a friend, who, to get away from his visiting in-laws, proposes that they drive to Mexico for a week or two. And it is in Mexico that Edward is able to see man *dans le vrai*, in the real, as Flaubert said of the Parisian proletariat. Undisturbed by distraction, unfragmented by the contradictory demands of influence, the Mexican peasants of the small town of Pátzcuaro are visible, palpable, in their humanity. Not superior or saintly, not a sentimentalized primitivism, simple enough to be uncorrupted, to be relatively uncorrupted, the disease of contemporaneity. They live not only in the present but in an unbroken chain of history that goes all the way back to the beginning. They have not traveled far enough to lose themselves in the middle of their journey.

Encouraged, Edward goes to mass to see Pátzcuaro's beloved effigy, *Nuestra Señora de la Salud*, Our Lady of Health. And then, like a loveless man ambushed by emotion in a group therapy meeting, he rejoins the human race. He can do it here because the terms of the contract are so simple that even a child, even a man at his wit's end, can understand them. Merely to belong to the species is, in a sense, to believe. Someone on each side of him is holding his sore hands, part of a self in their hands. As the author puts it, "the keg of nails was springing leaks. The outflow did not cease to flow into the void, but now he felt a new and strong counterflow — himself out." "Everything — time-place, here-there, now-then, this-other, I-other, all the landmarks of human awareness—went up in the explosion of light. All consumed, incinerated, the waves of agony and beauty, tragedy and elation, pleasure and pain, consciousness volatilized in the fire of being, the unthinkable spirit of human being. . . ."

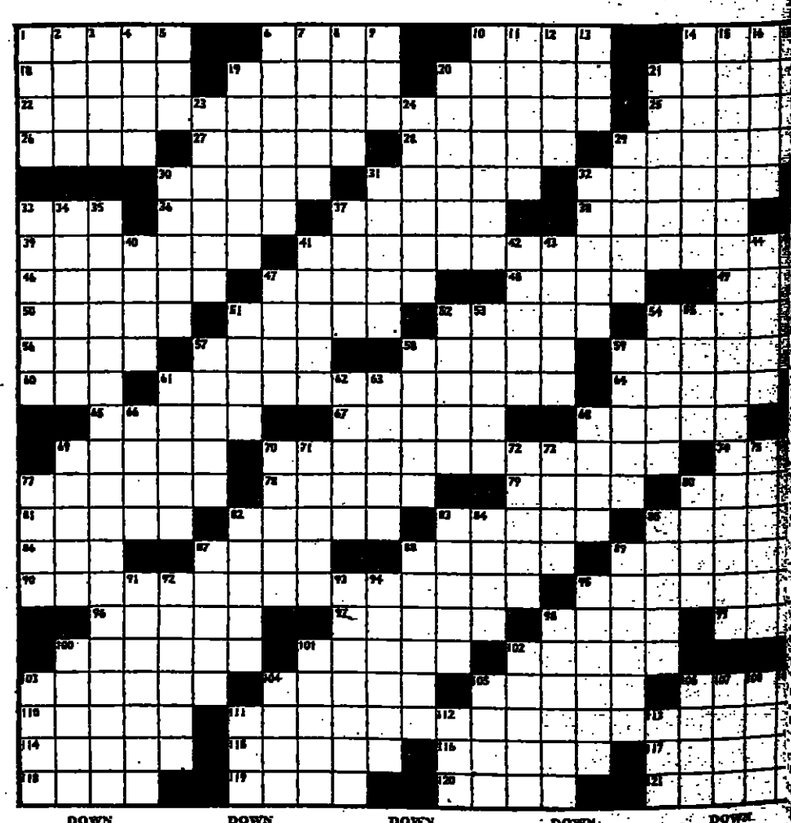

As you can see, Mr. Granat's epiphany is well described. It should satisfy even those with bad taste runs to the secular. "Regenesis" is spiritual without being in the least dogmatic. The author does not insist. Some readers may even regard its resolution as a "poetic" rather than a religious one. But just as Edward's illness could not cohere without the final "passion," neither could Mr. Granat's novel. And it is pleasant to see how the spiritual—assuming all the ambiguities of the term—can still move us, once we stop "clinging to the childish ways of our sophistication." We need to be reminded that it is possible "to rise into love as well as to fall into it."

*Anatole Broyard is a New York Times book reviewer.*

## An Experiment for 3 Years

# American League to Use 'Designated Pinch-Hitter'

By Joseph Durso

NEW YORK, Jan. 12 (NYT).—The owners of the 24 major-league baseball teams took a radical step yesterday to put more punch into the game. They voted to allow the American League to use a "designated pinch-hitter" to bat for the pitcher without forcing him from the game.

The plan will be tried experimentally for the next three seasons by the American League, which has been hurt financially in recent years and has been searching for ways to energize baseball. But it will not be used in the National League, which has resisted the change, or in the World Series, the All-Star Game between the two leagues, or in interleague exhibition games.

The action was voted at a joint meeting of the major leagues in Chicago yesterday, with commissioner Bowie Kuhn breaking an impasse between the leagues. As a result, for the first time since the American League was organized in 1901, the two big leagues will play ball under differing rules.

Another proposal to dramatize baseball—regular games between teams from the two leagues—was turned over to a study committee, with expectations that it would be approved in 1974.

The "designated pinch-hitter" will become the 10th man in a team's line-up, but his only function will be to bat for the pitcher.

By approving the experiment, which was tried in the high minor leagues three years ago, the club executives made the most basic change in the rules since 1903. That was when foul balls were ruled strikes. In 1920, the spitball was banned; in 1930, the "lively" ball was introduced; the strike zone was widened in 1962 and narrowed again in 1969, and the pitcher's mound was lowered in 1969.

But none of those changes revolutionized the rules that were essentially followed since the days of the old New York Knickerbockers baseball club 125 years ago.

The rules called for nine men on a side with the stipulation that if a pinch-hitter went to bat for one of the nine, then the player who was batted for had to leave the game. The most frequently replaced players were the pitchers because they were usually the weakest hitters.

Under the change that will take place in the American League, eight of whose 12 teams lost money last season, the manager can give the umpires a line-up card before the game with the nine regular players listed by position and the 10th player listed as the "designated pinch-hitter."

If the starting pitcher were replaced later by a relief pitcher, the designated pinch-hitter also would bat for the reliever when his turn came.

If the manager decided to replace the designated pinch-hitter with another pinch-hitter, he could do it at any time. But the second man then could be used only for that purpose and could not play in the field, while the first pinch-hitter would be out of the game.

Except for the "designated" man, all the other players customarily used as pinch-hitters would follow the old rules.

*When the experiment was tried* in the International league in 1969, batting averages rose 10 percent, the number of runs scored rose 6 percent and games took six minutes less time to play on the average. The reason for that was no surprise to the fan or television viewer: changing pitchers is the most time-consuming maneuver in baseball.

The experiment was ended after one year because the major leagues did not want their young players trained under different rules than those under which they would play in the big leagues.

### Braves Fire Richards

ATLANTA, Jan. 12 (UPI).—The Atlanta Braves dismissed Paul Richards as vice-president for baseball operations today and *moved Eddie Robinson into his* job. The ouster had been expected, with Robinson taking over many of Richards's duties last June when he was named director of player personnel.

Bill Bartholomay, chairman of Atlanta LaSalle Corp., the parent company, also told a shareholders' meeting that Daniel J. Donahue would take over as president of the Braves.

### Rice, Paul Named

NEW YORK, Jan. 12 (UPI).—Del Rice, who managed the California Angels in 1972, has been named special assignment scout by the team. Rice, 50, was replaced by Bobby Winkles after the season.

In another baseball action, Gabe Paul, vice-president and general manager of the Cleveland Indians, has joined the New York Yankees as one of the 15 new owners. Paul, 62, who was an executive with the Cincinnati Reds and Houston before joining the Indians 12 years ago, said he had divested himself of all interest in the Indians except for stock, "which will be sold at the earliest opportunity," he said. "Meanwhile, it is in escrow."

## Rangers' Stemkowski Stars

# Sabres Are Humbled at Home For First Time in 22 Games

NEW YORK, Jan. 12 (UPI).—Pete Stemkowski scored a hat trick to give the New York Rangers a 4-2 victory over the Buffalo Sabres *last night in a* National Hockey League game. It was the Sabres' first loss on home ice in 22 games this season.

The loss also broke a twelve-game winning streak at home for Buffalo, which had defeated the Rangers in all four meetings this season.

Stemkowski put New York ahead, 2-1, at 11:07 of the second period when he took a centering pass from Rod Seiling and scored from 10 feet out. He made it 3-1 at 19:29 of the same period.

*His final goal came with only* 1 second left in the game, after the Sabres had removed goalie Ken Dryden in an effort to tie up the game by using an extra man up front.

The Rangers trail the East Division-leading Canadiens by 5 points and second place Boston by 1 point. Montreal didn't play and the Bruins tied Minnesota.

### Bruins 1, North Stars 1

At Boston, *Fred Harvey* drilled a 15-footer past goalie Ed Johnston midway through the second period to give Minnesota a 1-1 tie with Boston. The tie left Minnesota without a victory on Boston ice in the five years the North Stars have been in the league. Their won-lost-drawn record is 0-12-3 at Boston and they have only two victories over the Bruins in 30 meetings.

### *Kings 3, Flyers 2*

Bob Berry scored his 22d and 23d goals of the season as Los Angeles came back from a 2-0 deficit to defeat Philadelphia, 3-2, on the road. Don Kozak scored the winning goal with 1 minute left. He scored on a rebound with goalie Doug Favell on his stomach out of the net.

### *NHL Results*

Thursday's Games

New York 4 (Stemkowski 3, Ratelle), Buffalo 2 (Robert, Mickey).
Boston 1 (Hodge), Minnesota 1 (Harvey).
Los Angeles 3 (Berry 2, Kozak), Philadelphia 2 (Barber, Clarke).

### WHA Results

Thursday's Games

Ottawa 4 (Sentes, Charlebois, Trotter, Leduc), New York 1 (Jones).
Cleveland 4 (Buchanan 2, Shmyr, Hindley), Minnesota 3 (Klatt, Hampson, Johnson). Ron Buchanan scored the Crusaders' second short-handed goal of the game, with 1:01 left, for victory.
Houston 5 (Hale, Hall, Harris, Poeksra, McCallum), Chicago 0. The Aeros scored two short-handed goals and recorded their first shutout of the season. The Houston goalie was Don McLeod.

# Challenge Set Over NCAA Olympic Move

By Gordon S. White Jr.

CHICAGO, Jan. 12 (NYT).—The Eastern College Athletic Conference, with 206 member colleges and universities, will challenge the right of the National Collegiate Athletic Association *Council to withdraw the* NCAA from membership in the United States Olympic Committee.

The council, acting on its own last Nov. 25, took the 664-college NCAA out of the USOC in the latest step over control of amateur athletics in the United States.

Each ECAC institution also is a member of the NCAA, so that the Eastern group's challenge constitutes an objection by nearly a third of the NCAA membership.

The NCAA Council is made up of 18 men. Some persons have accused it of being controlled by Walter Byers, executive director of the NCAA who is not a voting member of the council.

Robert M. (Scotty) Whitelaw, commissioner of the ECAC, said yesterday that his conference might present its challenge to the *NCAA membership at a meeting* here tomorrow that concludes the NCAA's 67th annual convention.

No action is expected by the NCAA on the objection. But Whitelaw said, "We want to strongly present the argument that we feel the council had little right to take such a move."

### Power Struggle

For years the NCAA and the Amateur Athletic Union (AAU) have fought over *the right to be* the major amateur athletic body in the United States. The AAU is represented heavily on the Olympic committee.

Whitelaw said, "The ECAC *wants an opportunity to continue* to work with the USOC representing our colleges and athletes in international competition. The council, we feel, may have had the right to act the way it did. Although it is permitted to act for the membership between the annual conventions, the importance of this move was such that the council should have gone to the NCAA members for approval."

### Centenary Banned

Meanwhile, the NCAA Council has placed Centenary College of Shreveport, La., on indefinite probation and declared ineligible for varsity competition five of Centenary's basketball players, including Robert Parish, a 7-foot freshman who was recruited by many colleges last year.

Western Kentucky and New Mexico State basketball teams were put on two-year probation for violations that allegedly included illegal payment to athletes at New Mexico State and improper financial aid to athletes at Western Kentucky.

Howard *University's* soccer program received a one-year probation and the council vacated the 1971 NCAA soccer championship won by Howard. The Washington school was found guilty of using ineligible athletes.

### Cordin Tops Ski Trials

GRINDELWALD, Switzerland, Jan. 12 (UPI).—Carl Cordin of Austria today set the fastest time in the non-stop practice for tomorrow's World Cup downhill Alpine ski race. Rolland Collombin of Switzerland, the World Cup leader, clocked the second best time.

### ABA Results

*Thursday's Games*

Indiana 107 (McGinnis 32, Freeman 27), Dallas 106 (R. Jones 31, Netolicky 20).
Denver 113 (Simpson 33, Roberts 26), San Diego 109 (Williams 37, Moore 19). Ralph Simpson led a comeback by the Rockets with 24 of his 33 points in *the second half.*

# 3 of 6 Common Foes Favor Redskins

## *1 Picks Dolphins In Super Bowl, 2 Call It Close*

By Dave Brady

NEWPORT BEACH, Calif., Jan. 12 (WP).—It is unusual in that although they are in different conferences the Washington Redskins and Miami Dolphins have played six common opponents.

*Of the six coaches,* three picked the Redskins, one chose the Dolphins and two saw the outcome of the Super Bowl as a close thing that could turn on a break. The Redskins are 3-point favorites.

It is a commentary on the forgive-and-forget nature of coach Alex Webster of the New York Giants that he agreed to make a clear-cut judgment on the outcome of Super Bowl VII on Sunday.

The Giants were beaten, 23-16 and 27-13, by the Redskins in the NFC East and by the Dolphins, 23-13, in an interconference game.

There were some bitter words and some fistic exchanges after the second Redskin-Giant game because coach George Allen of Washington called a timeout with 24 seconds remaining and Larry Brown scored an unnecessary touchdown.

In talking about Sunday's game from his home in Sea Girt, N.J., Webster said, "I feel this—Washington is a little stronger; the Redskins got stronger at the end of the season. Miami was fighting to win at the end, as it looked on TV.

"It will be a game of turnovers; it has been that way the whole year. Washington is NFC, so I would like to see them win. George is my friend [in a mocking tone]. No, I didn't mean some of the things I said after our second meeting. A game is a game. I hear it was not his fault."

Pressed to pick the winner, Webster resisted briefly, but said, "OK, I got to go with Washington, but I just did a big article for one of our papers and did not pick anybody."

Other coaches who played the two conference champions compare them this way:

Bob Holloway, St. Louis: "Miami relies more on offense. Washington relies in a big part on defense. It will depend on the Washington defense to hold a running team and contain Bob Griese from throwing a scrambling pass to Paul Warfield.

"The Washington defense is more veteran, with fellows like Jack Pardee and Chris Hanburger and Pat Fisher and Mike Bass. They played the running game well against Green Bay and Dallas. On offense, Bill Kilmer has executed superbly, throwing inside and then outside and then going for the bomb.

"I have to lean a little more to Washington. I think this is the year of the Redskins."

Weeb Ewbank, New York Jets: "I am torn between two things. I want our AFC team to win and Don Shula has something going that we probably will never see again—a team going unbeaten this far..."

"Errors are bound to come up and one team is going to crack. Larry Csonka never fumbled last year until the Super Bowl. I don't believe he will fumble this year. I have to go with our conference, but the Redskins are much better than when we played them."

Bud Grant, Minnesota: "We played them both early and both games were close. We were beaten by 3 points by the Redskins and 2 by Miami. I don't know that they have changed any since then; they are pretty consistent.

"Regardless of what Don Shula says, the Dolphins had the easier schedule. I got the impression at the end of the season that Washington had the better football team.

"If asked to pick a winner—out of loyalty to the conference more than anything else—I would say Washington."

Lou Saban, Buffalo: "After being wrong on four of my five picks in the playoffs, I am done predicting. We lost to Miami twice, of course [The Bills beat the Redskins, 24-17.]

"They are similar teams on offense—they play possession football. There is more variation in the Redskins' defense. Neither *club is likely to get going wild.* It may be won by the special teams . . . on a crucial error . . . a blocked punt . . . an intercepted pass . . . a fumble. I liked Oakland but it lost on a freak *play. A blocked punt beat Cleveland.*"

John Mazur, New England: "Both are very fine teams. Miami has a little more firepower [the Dolphins beat the Patriots, 52-0 *and 37-21]. The Redskins have* a stronger defense [the Patriots won over Washington, 24-23]. It will be a close game."

Associated Press.

HE'S No. 1—*Five-foot-8* Gary Yepremian *of the Miami Dolphins* practices his *soccer-style kicking for the Super Bowl on Sunday.* Quarterback Earl Morrall is the holder.

# *Miami Anticipating Stacked Defense*

By George Solomon

SANTA ANA, Calif., Jan. 12 (WP).—The Miami Dolphins yesterday entered the final phase of their preparations for Sunday's Super Bowl VII against Washington wondering with some anxiety if they will be confronted by the five-man defensive front the Redskins used to crush Green Bay's feared running attack.

"I wouldn't put it past them," replied Dolphin fullback Larry Csonka when asked if he and his teammates were expecting George Allen to use the unorthodox align*ment Sunday.* On Dec. 24, the Redskins defeated Green Bay, 16-3, in a playoff game in which they held 1,000-yard runner John Brockington to 9 yards in 13 carries.

For the Packer game, Allen added an extra man—middle guard Manny Sistrunk—to the defensive line in place of the middle linebacker. The results were devastating with Sistrunk playing an exceptional game.

### 'Awfully Tight'

"*I think we'll see* whatever Washington feels it must use to stop our run," Csonka said. "If they use the five-man line, it will be tough on us. It becomes awfully tight trying to wedge between that many pairs of shoulder pads."

At his press conference before football practice, Allen showed the footwork of a Sugar Ray Robinson, avoiding a direct answer when pressed if he would use the five-man front against the unbeaten Dolphins. Miami compiled its 16-0 record primarily on the strength of its running attack, which during the regular season produced an NFL record of 2,960 yards.

"A five-man line would be a gamble on our part," said Allen. "With Bob Griese being such a good passer and scrambler, such a move might not be advisable.

"Anyway," Allen continued, "they've already seen the alignment on film. When we pulled it against Green Bay, it was a surprise."

Griese said the Dolphins were preparing to face the five-man front.

"*We'd like to see them put nine* men up there," he cracked.

Miami coach Don Shula said: "It's a first-down defense used against teams that have a good ratio of run over pass. Our ratio is *about 3 to 1.* We think we have the offensive weapons to cope with any situation."

Allen noted that Griese is more dangerous as a passer than Green Bay's Scott Hunter, a factor that could influence his decision.

"It's not going to make a difference," said Miami's superb guard, Larry Little. "Our offensive line is better than Green Bay's or Dallas's. If they try it, it will boil down to man against man. And that's fine with me."

# *Lions' Schmidt Resigns*

DETROIT, Jan. 12 (UPI).—Joe Schmidt today resigned as head coach of the Detroit Lions after a six-year reign that failed to produce a consistent National Football League winner.

Schmidt, 40, became head coach almost exactly six years ago when Harry Gilmer was fired by Lion owner Bill Ford on Jan. 6, 1967.

A year before, Schmidt, who was rated as one of the finest middle linebackers in pro football, had retired as an active player and joined the Lions' coaching staff.

Schmidt's resignation comes after a disappointing season in which Detroit finished with an 8-5-1 won-lost-tied record and failed again to get a playoff berth.

When Schmidt became coach in 1967, he and Ford announced a five-year plan to bring a Super Bowl victory to Detroit. The deadline has passed.

## Sports Shorts

**Monique Berlioux**, the information director of the International Olympic Committee, reports Friday from Lausanne, Switzerland, that with just three days left to submit bids, only three candidate cities have been entered by their national Olympic Committees to replace Denver as the host of the 1976 Winter Games. The three are Salt Lake City, a group of French Alpine resorts in the Mont Blanc area and Innsbruck, Austria.

* * *

**Lance Rentzel**, a wide receiver for the Los Angeles Rams, has been booked for investigation of possession of marijuana for sale, authorities report. The 29-year-old former Oklahoma star was taken into custody at his Hollywood home after police armed with a search warrant found a half-pound of the drug and what they said were "narcotics par*aphernalia.*" He was released from the West Los Angeles police station on $5,000 bail. It was the second scuffle with the law for Rentzel in 20 months. In April, 1971, while with the Dallas Cowboys, Rentzel pleaded guilty to a charge of exposing himself to a 10-year-old girl. He was given a five-year probated sentence, under the condition that he receive regular medical and psychiatric care.

# J.C. Snead Shoots 62, Leads by 1

PHOENIX, Jan. 12 (UPI).—J. C. Snead, a 30-year-old nephew of Sam Snead, shot an 8-under-par 62 yesterday for the first-round lead in the $150,000 Phoenix Open golf tournament. Snead's score was the best in the last 12 months on the pro tour, yet he held only a 1-stroke lead as the Arizona Country Club course yielded scores of par-70 or better to almost half the field of 144.

Dale Douglass was alone in second place, touring the 6,216-yard layout in 63 with birdies on the last four holes.

Jack Nicklaus, Lee Trevino, Arnold Palmer and Bill Casper are not competing in this event, second of the year on the pro tour.

*FIRST-ROUND LEADERS*

| | |

**Art Buchwald**

# *What's Up, Dad?*

WASHINGTON—It must be very tough for a congressman or senator, when he comes home at night, to explain to his teen-age children what is going on in Vietnam.

"Daddy, where were you when they were bombing the cities of Hanoi and Haiphong?"

Buchwald

"I was in recess, and you damn well know it."

"But why don't you protest now?"

"Because it would hurt the sensitive negotiations going on in Paris which hopefully will lead to a just peace in Indochina."

"Why didn't you protest before?"

"Because I didn't want to hurt the sensitive negotiations that have been going on for the last four years which would lead to an honorable peace in Indochina."

"But didn't you see all the photographs of civilians being killed and hospitals being destroyed?"

"Damn it, son! You don't understand the role of Congress. We're supposed to support the President during war. If we oppose the war, we will be giving aid and comfort to the enemy."

"But I thought Congress was supposed to declare war."

"Who told you that?"

"It's in the Constitution."

"Now don't believe *everything* you learn in school. Technically it's true that Congress should declare war, but, you see, we're not really at war. It's a police action."

"When does a police action become a war?"

"When the President asks for an official declaration. Since three Presidents have not asked us to declare war, there is no reason for us to do so."

"Doesn't Congress have any say in what the President can do in Indochina?"

"Of course it does. The President has to ask for our advice and consent before he makes any *major decisions* which involve the lives of American boys, and the expenditure of billions of dollars."

"Well, why hasn't he done it?"

"He probably forgot."

"All the kids at school say Congress is afraid to act on the war."

"A lot they know. Congress has taken many strong stands on the war—uh, uh, police action. We've requested that the President work out a peace *settlement* and bring our POWs home. It's all in the Congressional Record."

"But nothing's happened, things are getting worse. If the President can't stop the war, why doesn't Congress?"

"*For a simple reason, smart* guy. The President probably knows something we don't know."

"Why doesn't he tell you what he knows?"

"Because if he told us, someone would probably leak it, and then the press would know and the American people would know. Do you want to have every Tom, Dick and Harry in this country find out what the President knows about the war?"

* * *

"Dad, don't get mad, but the kids at school say Congress is impotent. They say you're all a bunch of eunuchs, and the President can do *anything he wants* because you're afraid of him."

"Well, you can just tell the kids at school they don't know what the hell they're talking about. Why, we were talking about how to get out of this war when they were in kindergarten. It's very fashionable these days *to complain that the President* hasn't found a peaceful solution to the Vietnam conflict. But he's only been at it four years, and you've got to give him a chance. If at the end of his second term in office he hasn't come up with a solution, then Congress will take decisive action."

"Great, dad! Wait till I tell the guys at school!"

## *Prints of Hitler's Paintings for Sale*

MUNICH, Jan. 12 (AP).—An advertisement in today's edition of a West German weekly newspaper offers "The Artist Adolf Hitler"—a set of reproductions of paintings done by Hitler during World War I—for 88 marks.

The advertisement claims that the limited edition of "seven of the most well known watercolors and sketches" Hitler did in this period were *faithful color reproductions.*

**MARY BLUME**

# The Ephemeral Occupation of Peter Hall

LONDON (IHT).—Shepperton is a tidy, almost prim English film studio that looks as if it should be enclosed by an herbaceous border, so the set there for Harold Pinter's "The Homecoming" seems especially disquieting and uninviting.

It is, someone points out, one set from which no one would want *to pinch* a prop: a large room in an old house in North London, all in shades of gray. The actors are gray, too, and Paul Rogers, who plays the old father as he did on the stage, keeps giving affable little smiles off-camera that are unintentionally hideous 'cause his teeth, too, are now gray. But the director, Peter Hall, is in black and white: black jacket and trousers, striped shirt, black tie. He is in tone with the rest but more emphatic, outstanding. As he points out later, every shade is important in this film.

## Eight Plays

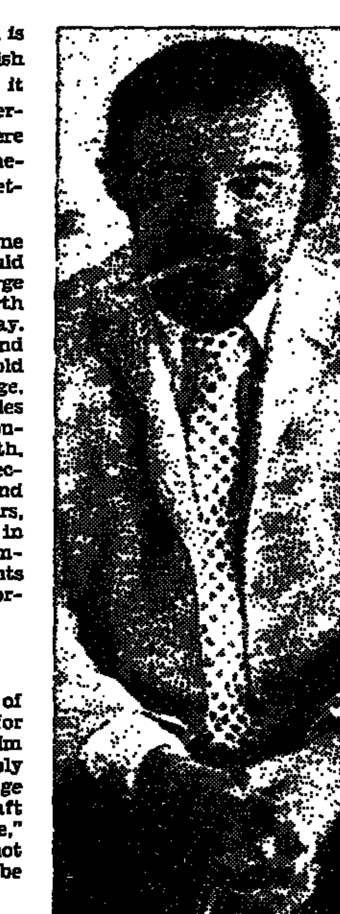

"The Homecoming" is one of the eight plays being filmed for Ely Landau's American Film Theater. Hall is using terribly *strong lights, including* a huge World War II anti-aircraft searchlight, "to give a hard edge," he says. While it is being shot in color, it should, he says, be in black and white.

"As Pinter's theater exists in closely calculated ambiguities, you mustn't make statements without knowing *you're making* them. That includes using color. A lady in a red dress is very dangerous."

*Peter Hall directed the original* stage version of "The Homecoming" in London in 1965, and the Broadway version two years later. After seven years, he says, the work strikes him as a masterpiece, better than ever.

"Basically, we're using the camera to concentrate even more closely on the jungle warfare of the family. It's not naturalistic. *If we'd gone into a real house* and shot it, it wouldn't work.

"*If it works,*" he adds with a broad smile, "it will be a new

Dominic.

**Peter Hall**

style. If it doesn't, they'll say it's stagey."

In close-up photos, Peter Hall's round face and small clever eyes give the impression that he is short and chubby. In fact, he stands over 6 feet, is lean, quick, ambitious, confident enough to be very outspoken, a bit of a buccaneer in his short black beard. "I have," he says, "been pretty lucky and pretty wary."

Now 42, he has been one of England's top directors almost since he started in London in 1954. The next year he staged "*Waiting for Godot,*" *presenting*—indelibly, as it turned out—the two leading characters as tramps, though there is nothing in the text to support this view. He has directed over *70 stage productions* and, as managing director of the Royal Shakespeare Company from 1960-68, he helped create the most interesting and important *English-speaking theatrical company* of the decade.

Last spring he was appointed director designate of Britain's National Theatre company, succeeding Lord Olivier.

He will start working full time for the National next month, or would if full time existed for him. "I always like to do two or three things at once. I've always found if I do just one it's less good."

In addition to the National, Peter Hall will be finishing up "The Homecoming" and will stage "The Marriage of Figaro" at Glyndeborne, where his superb production of Monteverdi's "The Return of Ulysses" will also be revived. Peter Hall adores opera and has described it as the most *potent form of theater*—"when it's flawless," he adds.

## Verve

A director of tremendous verve, Peter Hall has not only staged contemporary works including a musical called "Via Galactica" that opened and closed within about five minutes on Broadway *this winter, but he has also made* major contributions to Shakespeare productions with his and John Barton's Wars of the Roses cycle for the Royal Shakespeare Company.

It was Hall who moved the rather fustian company from Stratford to the London Aldwych Theatre *too, pointing out* that actors like to wear lounge suits as well as tights. The opposition was tremendous:

"People said who asked them to come to London. There were attempts to stop us from getting a theater in London. We had no subsidy at all at that point."

By the end of Hall's tenure the company was comfortably subsidized. "*It's like engaging in* a battle," Peter Hall says with a shrug. "*You're a hero if you* win."

The point is that he adores battles and is an expert infighter.

"I love boards and I love committees. It's part of the politics of living." He has been called a ruthless schemer; he is certainly effective and a realist. His one area of failure so far has been films: invited to work in Hollywood with his first wife Leslie Caron, he wisely refused (it was, he is sure, a ploy to keep Miss Caron in Hollywood), and he has made four films without much success.

## The Medium

"I don't think I understood the medium," he says. "I'm not talking in terms of technique or craft, but in having the feeling for it. But I think the feeling is coming now."

Peter Hall's wide-ranging activities in theater, films and opera might sound like disorganized ego trips, but each branch, he points out, nourishes the other.

"*I think the sort of thing* we're doing in 'The Homecoming' might have an influence on the National Theatre—the publication of plays on film, not the filming of stage productions. I hope this will be a *film* called 'The Homecoming.'

"I've spent a lot of time on the subtle minutiae of Pinter and Albee. I know they think in the theater that I'm more and more obsessed with the pinhead. But I'm balancing that with baroque opera, and baroque opera will lead to late Shakespeare.

"I know the baroque operas at Glyndeborne will lead me to 'The Tempest' just as Pinter and Albee are leading me to Chekhov." Mr. Hall has done 24 Shakespeare plays, but none since 1968. He has never dared try Chekhov.

He has made theater history, but Peter Hall says he is the despair of theater historians. "I don't keep clippings, programs, or *photographs, nothing,*" he says.

"I think I work in an ephem*eral occupation and so I just get* on to the next job."

# PEOPLE: *The Joy of Cooking—Behind Prison Bars*

Last month James Lambros, 24, walked out of a San Francisco county jail, a free man after serving a six-month sentence. The next day he was back—as head *chef at a monthly salary of $800.* To everyone's general relief.

Seems that the prison food had been awful for years, awful and always the same, half-frozen fishcakes on Friday, hot dogs and beans on Monday, etc. Even county health inspectors said it was terrible.

Enter Lambros, jailed on a pornography charge arising out of his temporary job as manager of a nude movie house. But his real love was cooking—he had studied it in college and had once worked for an exclusive Beverly Hills restaurant. He didn't like the jail food much either. So he wrote a 17-page memo to officials suggesting improvements. They packed him off to the kitchen and soon inmates were getting pancakes, pizza, fried chicken and even roast beef. All good.

When he'd served his time, officials asked him to stay on, although he'd been offered more money elsewhere. "Inmates are human beings too," Lambros said. "I believe in what I'm doing and that what I am doing is needed."

* * *

American-born Countess Estelle Bernadotte, 68, will marry her former secretary and settle on the French Riviera, the Swedish court said today. She is the widow of Count Folke Bernadotte who was murdered while on a UN peace mission in Palestine in 1948. Her husband to be is Carl-Eric Ekstrand, 62, son of a policeman, who was a *sergeant* in Count Bernadotte's regiment. When the count left military service, he took Ekstrand along as his secretary. Ekstrand was appointed accountant to the Swedish royal court in 1935, surveyor of the royal household in 1948 and *chief surveyor* this year.

Sweden's 90-year-old King Gustav VI Adolf has reportedly given his blessing to the marriage, which will take place in the spring.

The countess is the daughter of the late Edward H. Manville, the American asbestos millionaire.

* * *

The Harvard Club, a men-only sanctuary for 107 years, voted 2,097 to 695 Thursday to admit women. Other Ivy League clubs led the way—Princeton in 1963 and Yale in 1969.

MARBLES OF JUSTICE: Three circuit court judges in Charlotte County on the west coast of Florida divvy up their work with a toy gumball machine loaded with marbles. The machine has red marbles for Judge John Rose, green for Judge Charles Carlton and colorless ones for Judge Harold Smith. Whenever there's a *case to be assigned,* deputy court clerk Linda Johnson drops in a penny, cranks the handle and out pops a marble. Miss Johnson says she's rigged the machine *to refund her penny.* Which leads one to wonder if it's possible to rig the marbles.

* * *

The topic of the day was apathy. Jenny Collins, emcee of a Liverpool radio talk show, asked *listeners to phone in.* No one did.

* * *

RECKLESS: A 30-year-old Swedish man who was admitted to a Goteborg hospital the other day, the tip of his nose missing. He was bleeding. Quite a lot. Someone contacted the police. An investigation revealed that the man had overshot his mark in hacking up sausages for dinner.

SUED: Actress Glynis Johns, 49, for divorce, by Beverly Hills writer Elliott Arnold, 60, her fourth husband. Miss Johns, now living in London, married Arnold in 1964—he too had been married three times before. The couple separated in June, 1969. They have *no children.*

* * *

The largest (15,456-ton) passenger ship still flying the Stars and Stripes sailed from San Francisco last week on what was billed as the "world's most expensive" *round-the-world (95 days) cruise.* Three hundred passengers (a full load) paid from $3,200 to a reported $100,000 to make the trip aboard the SS President Wilson. When the ship makes port in April, the American President Line, founded in *1848 and the* largest American flag carrier in the Pacific, will go out of the passenger business.

* * *

Doris Coulson of St. Albans, England, had had it with the kids (Denis, 8 and Philip, 5) and "Mummy, can we watch the telly?" She threatened *to have* the set taken away. So when two *men showed* up at the house Tuesday saying they had come for the set, the boys naturally let them take it. The men were thieves.

S. JUSTICE.
